If you HAVE checked off any of the above properties or facility types, then you are not required to complete any more information on page 2 or 3 but are required to fully comply with the Backflow Prevention By-law. Please submit page 1 to the above address.

6	Indicate the serial number of your water meter as listed on your Alectra utility bill under "Meter Number" beside "Water". Serial Number:				
7	Indicate the size of your City water meter located on your water service line entering your building or property as listed on your Alectra utility bill under "Meter Type" beside "Water". 0015 0016 0020 0025 0038				
8	Describe the size and type of your water service line entering your building or property using the measuring tape provided on page 4. 15mm 17mm 20mm 25mm 38mm Greater than 38mm Service type: Copper Iron				
9	Describe the type of business activity below (please be specific, i.e. dry cleaner, shoe retailer, dental office, pet store, real estate office, variety store, hair dresser, etc.)				
10	Does your building or property have a separate water service line for a Fire Suppression System (sprinklet heads for fire)?		Yes No	If your property or building has a fire supression system, does it contain any chemicals or additives other than water: Yes No	
11	Please list any other equipment or process connected to your water service line that uses City water that has not been indicated on page #3 (Water use information) of this form.				
For Office use Only: TRN #		Degree of Hazard:		Backflow Device required:	Date C.C.C.S Form received:
Comments: Is this building or property required to comply at this time.		Moderate		Yes RP	<input type="text"/>
Yes No		High		No DCVA	

Step 6 & 7
Example from
Alectra Bill

Service	Meter	From	To	# Days	Previous Reading	Current Reading	Read Type	Multiplier	Usage	Adjustment Factor	Adjusted Usage
Electric	HZN6065174	01/27/2019	03/06/2019	38	97714.00	98322.00	Actual	1.00	608.000 KWH	1.037900	631.043
Water	71147383	01/24/2019	03/06/2019	41	1955.00	1979.00	Actual	1.00	24.000 M3		

Your Water/Wastewater Charges: Residential

Water Meter Size - 16 mm

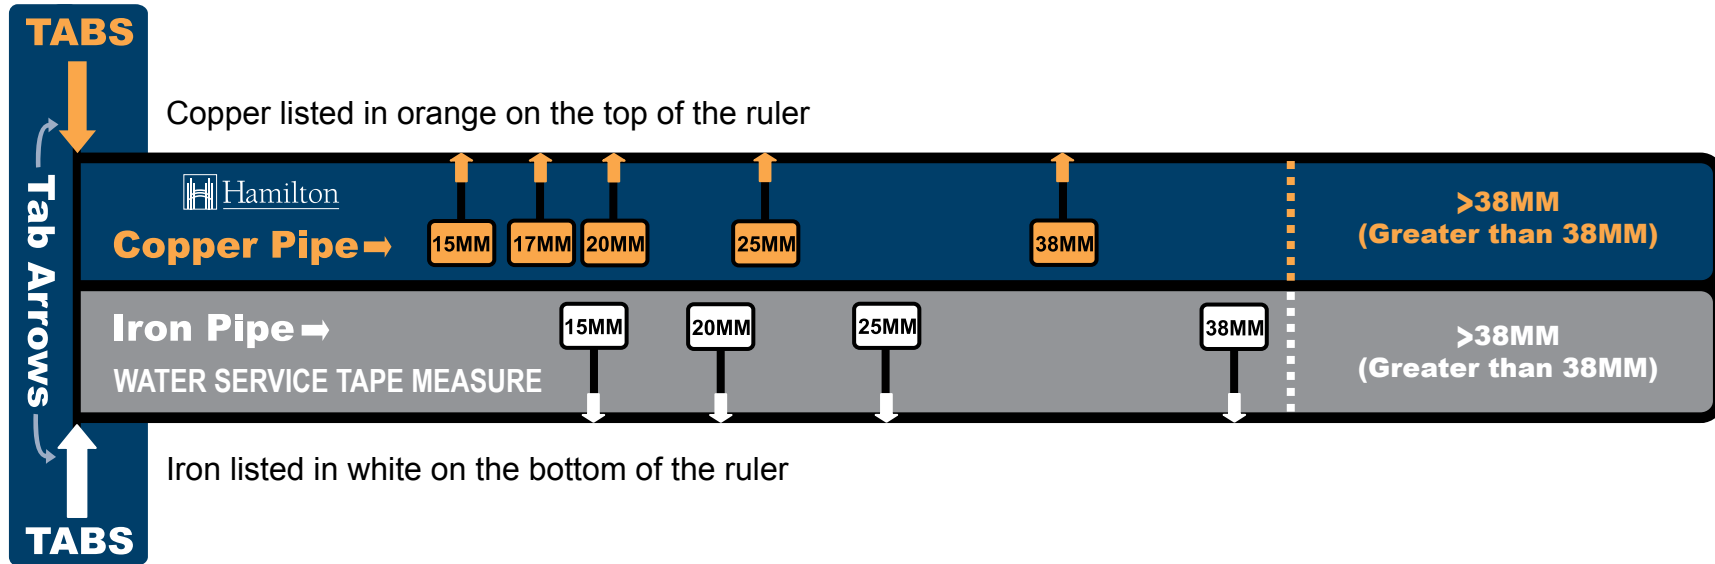

Any personal information on this form is collected under the authority of By-law No. 10-103 and will be used for the protection of the City of Hamilton's Water Distribution System from reverse flow . Information collected for the Backflow Prevention Bylaw will be stored on servers located in Canada and the United States, and may be subject to Canadian and/or American laws. Questions about the collection of this information should be directed to City of Hamilton, Backflow Prevention Program. 330 Wentworth Street North Hamilton, Ontario L8L 5W2. backflow@hamilton.ca

Water Use Information 

	YES	NO	If you answered yes to any of these questions and a Backflow Device is present, enter device type from selection below			
Does the building or property use City water in any manufacturing, industrial or process applications? If yes, please specify how it is used:						
Does the property use any hazardous or toxic materials or chemical that has a connection to the City water supply?						
Do any hot water boilers, steam boilers, heat exchangers exist on the property? If yes, does any of this equipment use chemical additives?						
Does your property have a lawn irrigation system that uses any type of chemical injection?						
Does your property have any type of water supply other than the water supplied in the City?						
Does your property have any cooling towers or chillers?						
Are there any solar heating systems on the property?						
Is there any autopsy or mortuary equipment of any kind located on your property?						
Is there a kitchen hood (canopy washer) with a direct City water supply connected to the washer located on your property?						
Do you have any type of automatic chlorinating/de-chlorinating equipment on your property?						
Do you have any water cooled equipment on your property with a solenoid valve after the compressor (walk-in cooler, ac units)?						
Are there any industrial wahsing machines located on your property (anything other than a coin-operated laundromat)?						
Is there any type of dental or surgical equipment with a connection to internal water piping located in your Building?						
Do you have type of food processing equipment on your property that is directly connected to your City Water supply? If yes, please specify how it is used:						
Do you supply any type of dockside facilities (water supply to any type of pleasure craft)?						
Is there any type of photo processing equipment located on your property that is connected to your City water supply?						
Do you have any type of water re-circulating system on your property?						
Do you use any type of degreasing equipment that is connected to the City water supply on your property?						
Is there a power washer with chemical additives on your property?						
Do you use any type of automatic chemical dispensers?						
Do you have any type of garbage washing or garbage disposal equipment that has a City water supply connected to it?						
Is there any commercial ice making equipment located on the property?						
Do you have any livestock equipment with a connection to your City water supply?						
Do you have any type of radiator flushing equipment?						
Is your property equipped with any type of sewage pump that is connected to your City water supply?						
Do you have any type of wash tanks on your property that are connected to your City water supply?						
Do you use City water to supply any type of water hauling equipment?						
Does your property have any x-ray equipment?

Step 8

Water Service Tape Measure

Directions for using the Water Service Tape Measure

- 1: Cut out the tape measure
- 2: Find your water service pipe where it enters your building/property
- 3: Hold "TABS" tight against the water service pipe
- 4: Wrap the measuring tape around the pipe
- 5: Line up "Tab Arrows" with the closest Copper or Iron MM arrow
- 6: Indicate this MM number and type of pipe above in **Step 8**
