SITE PHOTOGRAPHS

Appendix A - Site Photographs
Future HSR Storage and Maintenance Facility, Hamilton, Ontario

Photo 1 – View looking northwest at the salt storage structure and brine tanks located on-site in the fleet yard at 330 Wentworth St N.

Photo 4 – View of the containers stored on-Site in the north portion of the fleet yard at 330 Wentworth St N.

Photo 2 – View looking northwest at the northwest corner of the fleet yard at 330 Wentworth St N.

Photo 5 – View looking east at the bays used for waste storage and transfer in the northeast of the fleet yard at 330 Wentworth St N.

Photo 3 – View looking east across the fleet yard at 330 Wentworth St N. The Hamilton Specialty Bar steel plant is visible in the background (off-Site).

Photo 6 – View looking south at monitoring well BH32, which was installed on the east edge of the Site in 1996 for GSW Heating Products Company. On March 6, 2017, 0.86 m of LNAPL was measured in this well.

Appendix A - Site Photographs
Future HSR Storage and Maintenance Facility, Hamilton, Ontario

Photo 7 – View looking east across the south edge of the Site. The three manhole covers for the oil-water separator are visible in the grass area.

Photo 10 – View of the fuel storage tanks located off-Site to the southwest on the 330 Wentworth St N property.

Photo 8 – View looking east across the south parking lot at 330 Wentworth St N.

Photo 11 – View looking south across the Site from the north end of 80 Brant St.

Photo 9 – View looking northeast at the Hamilton Specialty Bar steel plant, located on the adjacent property to the east.

Photo 12 – View looking southwest along the northwest edge of 80 Brant St. The Hotz Environmental Services paint recycling facility is visible on the adjacent property.

Appendix A - Site Photographs
Future HSR Storage and Maintenance Facility, Hamilton, Ontario

Photo 13 – View looking east across the Site from 80 Brant St. The Hamilton Specialty Bar steel plant and electrical transformer substation are visible on the adjacent property.

Photo 16 – View looking east at debris strewn across the on-Site railway tracks to the north of the 2 Hillyard St property.

Photo 14 – View looking northeast towards the north end of the Site at 80 Brant St.

Photo 17 – View looking east along the on-Site railway tracks towards the bridge cross Birch Ave.

Photo 15 – View looking southwest at the location of the former on-site AST at 80 Brant St.

Photo 18 – View looking west along the south side of the Site on the 2 Hillyard St property.

Appendix A - Site Photographs
Future HSR Storage and Maintenance Facility, Hamilton, Ontario

Photo 19 – View looking north along the east side of the 2 Hillyard St property.

Photo 22 – View of the interior of the 2 Hillyard St building, now used for storage and workshop space by Duke Electric Ltd.

Photo 20 – View looking west across the north side of the 2 Hillyard St property.

Photo 23 – View of two cut-off metal pipes protruding from the concrete on the south side of the 2 Hillyard St building. The pipes are presumed to be from the former Niagara Paint & Chemical Company's solvent dispensing lines, which ran from the USTs in the north yard into the mixing room.

Photo 21 – View of the interior of the warehouse building located on the east side of the 2 Hillyard St property. The transformer stored in the warehouse are reportedly dry.

Photo 24 – View of the former paint mixing room inside the 2 Hillyard St building. Staining was observed on the concrete floor where the former solvent tanks would have been located.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by EcoLog Environmental Risk Information Services Ltd ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by EcoLog ERIS Ltd. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

RM:		Hamilton-Wentworth Region			
Facility:		Dump			
Date Active:		1915-64			
Date Begun:					
Date Complete:		1964			
Area (Ha):					
Landfill Type:		Open marsh fill			
Group Name:		Sherman Inlet			
Operated By:		Hamilton C			
Serial:		MOEE 0034 (alt)			
NTS:		30M05			
Diameter (m):					

Historical Summary:

Hamilton East End Dump Report on filling in Coal Oil Inlet and Sherman Ave. This inlet lay N of Wentworth St disposal works. Effluent from tanks discharges into inlet. Inlet budgeted to be filled in 150,000 cu yds and sewage discharge diverted. A F McCallum City Engineer (Hamilton City Council Minutes 14 Sep 1915 p609-610). Details of an agreement between Goldin and the city for dump salvage. City had previously been picking salvage with two men, Goldin now takes this over. Goldin required to cooperate with dump leveling and not interfere with smooth operation of dumps (Hamilton City Council Minutes 14 Sep 1920 p908). City Engineer E H Gray reports on agreement made between Simon Goldin and City 14 Sep 1920 allowing Goldin to pick the West End and Brant St dumps for \$1500 pa. Mr. Goldin has asked for contract to be terminated as he was losing money, or have his fee cut in half. Department has placed two men at dump picking. Salvage dept takes over pickings, proceeds split with garbage dept (Hamilton City Council Minutes 24 Nov 1920 p. 1085). Salvage dept re garbage dump pickings, Goldin, Simon garbage dump agreement rescinded. Simon Goldin had contracted for picking of West End and Brant St dumps, this work to be undertaken now by Works Department, contract cancelled (Hamilton City Council Minutes 24 Nov 1920 p. 1087). Dump Fire on ...nt street 10 Aug 1930 (Hamilton Herald 11 Aug 1930 p1). 1954 APM Sherman inlet filled to N of Burlington St, its footprint is just about evident, but developed and difficult to identify as landfill [YUML: 1954 APM 433794E]. Board of Works report of 26 Feb 1952 recommends second shift at incinerator to alleviate conditions on the present East End Dump. Board of Control recommends this be deferred (Hamilton City Council Minutes 26 Feb 1952 p150, Incinerator). Surveyor General 1952 Shows that Sherman Inlet has vanished south of Burlington Street and that Brant St has been completed across the line of Birch Ave. Barton Con 1 Lots 9-10 pt. [YUML G3524 H32A1 14 1952: Surveyor General, Ottawa The City of Hamilton and Vicinity Federal Electoral Districts The Representation Act 1952 Drawn and printed by the Surveys and mapping Branch, Ottawa, 1952]. City dumps policy of operation: Report recommends: West End dump to be open 7-4 M-F excluding holidays. East End dump open 7-4 M-F and 7-9 Saturdays. Shelter to be provided for watchman at East End dump, telephone and electric light, watch 24-7-52. Pickers permitted on dumps 7-3.30 M-F, weekly license fee of \$1. Institution of 24-7-52 watch at East End dump from May 15th (Hamilton City Council Minutes 1952 26 May 1952 Report of the Board of Control p443). In August-September 1950 there was a major strike of Hamilton's municipal outdoor workers (Toronto August 10 1950 p. 1; September 9 1950 p. 1). Newspaper coverage of the strike mentions that there were civic dumps in both the east and west ends of the city. Initially the mayor hoped to keep the dumps and incinerator open (Toronto Star August 10 1950 p. 1), but this did not happen. Pickets turned back the trucks and other vehicles which tried to take privately hauled waste to the dump (Toronto Star August 11 1950 p. 1). On August 15 there was serious trouble at the East End Dump when a car struck two pickets and police intervened (Toronto Star August 15 1950 p. 2). On August 17, shortly after midnight, a serious fire broke out in the swamp located between the East End Dump and the International harvester factory. Flames shot 100' into the air. The fire started in the dump, destroying a dumpman's shack, but the marsh ignited because it had been contaminated with oil leaking from an intake pipe at the plant. Hamilton's Mayor said that fires were frequent on the marsh (Toronto Star August 17 1950 pp. 1-2). On September 9 there was more violence at the East End dump. Police and strikers clashed when private vehicles tried to enter the dump. Traffic became backed up on Beach Road as cars waited to use the dump (Toronto Star September 9 1950 p. 1). The East End Dump appears to have been the scene of the most serious disturbances which accompanied the strike. At one point the works of the International Harvester plant threatened to march to the picket line at the dump en masse in a show of sympathy. The East End Dump was located on the road to Burlington beach (Toronto Star August 11 1950 p. 1). On August 17, shortly after midnight, a serious fire broke out in the swamp located between the East End Dump and the International harvester factory. Flames shot 100' into the air. The fire started in the dump, destroying a dumpman's shack, but the marsh ignited because it had been contaminated with oil leaking from an intake pipe at the plant. Hamilton's Mayor said that fires were frequent on the marsh (Toronto Star August 17 1950 pp. 1-2). Hamilton East End Dump A photograph of the picket lines at Hamilton's East End Dump, during the 1950 Strike was published in October 1950 (Civic Administration October 1950 p. 38). The dump was neglected during the strike, and no regular burning occurred. Rats, insects and smells were more obvious than normal. The MOH brought in DDT foggers and teated the dump with 6% DDT for fly control (Civic Administration October 1950 pp. 38-9, 66). In November 1956 Hamilton operated 3 sanitary landfills with tractor spreaders (Municipal Utilities Magazine November 1956 p. 62). In October 1963 Hamilton's East End dump had a life expectancy of one more year. The East End site was not being operated as a sanitary landfill as of October 1963. Private trucks preferred to dump here rather than haul loads up Hamilton Mountain. To save dump space, they were banned from this site in about 1963 (Civic Administration October 1963 p. 47).

36	1 of 1	N/50.5	79.8	HAMILTON HYDRO & ENGINEERING D BRANT ST,3 POLES EAST OF MCKENSTRY ST. TRANSFORMER HAMILTON CITY ON	SPL
Ref NO: 108593					
Contaminant Code:					
Contaminant Name:					
Contaminant Quantity:					
Incident Cause:: COOLING SYSTEM LEAK					
Incident Dt: 12/27/1994					
Incident Reason:: EQUIPMENT FAILURE					
Incident Summary:: HAMILTON HYDRO-0.5 L NON PCB TRANSFORMER TO GROUNDCLEAN-UP ONGOING.					
MOE Reported Dt: 12/27/1994					
Environmental Impact:: POSSIBLE					
Nature of Impact:: Soil contamination					
Receiving Medium:: LAND					
SAC Action Class:					
Sector Source Type:					
Site Municipality: 16101					
37	1 of 1	S/52.6	79.8	ON	BORE
Borehole ID: 623489					
Use: Geotechnical/Geological Investigation					
Drill Method:: Power auger					
Easting:: 594254					
Location Accuracy::					
Elev. Reliability Note::					
Total Depth m:: 6.3					
Township::					
Lot::					
Completion Date:: JUN-1967					
Primary Water Use:: Not Used					
Type: Borehole					
Status::					
UTM Zone:: 17					
Northing:: 4790443					
Orig. Ground Elev m:: 81.4					
DEM Ground Elev m:: 80					
Primary Name::					
Concession::					
Municipality:					
Static Water Level:: -999.9					
Sec. Water Use::

Approval Type: Status: Application Type: Client Name:: Client Address:: Client City:: Client Postal Code:: Project Description::		Industrial air Approved Amended CofA Amcan Castings Limited 10 Hillyard Street Hamilton L8L 7X3 Amcan Castings Limited seeks approval for the addition of two cooling towers to the existing Certificate of Approval 8-2074-99-206. The cooling water from the current die cast process is to be fed to the cooling towers, where it will be cooled and then returned back to the die cast process. The company would like to add another general exhaust fan to the facility. The facility's existing air make-up unit will make up the air that is to be removed by this exhaust fan. The applicant would also like to remove the aluminum melting/holding furnace from the site.

<u>73</u>	6 of 25	W/168.6	80.4	Currie Products Ltd. 350 Wentworth St. N. at Rosemary Avenue Hamilton ON L8L 5W3	COAL
Facility Type:		Coal tar distillation plant			
Size:		1-2 hectare			
NTS Map Sheet:		30 M/5			
Planned Land Use:		Same as present			
Present Land Use:		Industrial, active coal tar processing plant			
Landuse Adj Property:		North - industrial/commercial (Swift Motors); east - vacant field; south - vacant field; west - residential/commercial			
Underground Utilities:		Sewers, gas, water and telephone along Rosemary Avenue			
Soil Conditions:		Unknown			
Site Access:		Controlled - fenced			
Operating Period:		1977-present (11 years)			
Surface Water:		Hamilton Harbour			
Surface Water Prox:		800 m northeast of site			
Surface Water Use:		Industrial			
Groundwater Prox:		Unknown			
Groundwater Use:		None			
Existing Wells Prox:		None reported			
Historical Map/Photo:		No maps available (recent operation); 1984 air photo (NAPL A26888-51)			
Operators:		Currie Products Ltd. (1977-present)			
Present Occupants:		Currie Products Ltd., Marshall Currie Refractories			
Excavation History:		Unknown			
Visible Wastes:		Operating coal tar processing facility			
Odour:		Operating coal tar processing facility			
Water Pollution:		None observed or reported			
Site Investigations:		None known			
Comments/Remarks:		Active coal tar plant, back property is reclaimed land from Coal Oil inlet of Hamilton Harbour			
Site Description:		Currie Products Ltd. relocated from the Caroline St. site to a site at 350 Wentworth St. in about 1978. The site is located at Rosemary Avenue and Wentworth Street North and is occupied by Currie Products Ltd. and Marshall Currie Refractories. Tar tank storage and distilling/processing facilities are located at the rear of the existing building. The rear of the site is fenced with controlled access. The site is located in a mixed residential/commercial/industrial area with a car dealer located to the north, vacant land to the east and south and residences and a bar-restaurant to the west. The back of the property is reclaimed land from the Coal Oil inlet of Hamilton Harbour. There is no groundwater use in the area and the closest surface water is Hamilton Harbour at 800 m north east of the site. This is an active tar distillation/processing plant and was therefore not subject to assessment of potential environmental impact.

<u>86</u>	1 of 1	NNW/195.4	79.8	Newalta Industrial Services Inc. 37 Brant St. NEWALTA<UNOFFICIAL> Hamilton ON	SPL
-----------	--------	-----------	------	---	-----

Ref NO: 4775-6R7SS4
Contaminant Code: 41
Contaminant Name: DIESEL FUEL AND WATER MIXTURE
Contaminant Quantity: 150 L
Incident Cause:: Overturn - Truck Or Trailer
Incident Dt: 6/28/2006
Incident Reason:: Other - Reason not otherwise defined
Incident Summary:: Newalta, 37 Brant St. Hamilton: MVA spill 150L diesel
MOE Reported Dt: 6/28/2006
Environmental Impact:: Possible
Nature of Impact:: Soil Contamination
Receiving Medium:: Land
SAC Action Class:
Sector Source Type: Marine Terminal
Site Municipality: Hamilton

Description:: Dofasco Inc. has been fined \$60,000 ' plus a victim fine surcharge ' after being found guilty of one count under the Ontario Water Resources Act (OWRA). Dofasco Inc. is an integrated steel mill on Burlington Street East in Hamilton, Ontario. Hamilton Harbour is a habitat for both aquatic life and a number of different bird species. The court heard that an investigation by Ministry of the Environment (MOE) staff found that, on January 21, 2000, a significant amount of wash oil spilled from a company by-product mill storm sewer outfall eventually discharging into the Hamilton Harbour. The spill resulted in the deaths of more than 100 ducks, birds and waterfowl as well as numerous fish. Dofasco Inc. officials did not report the spill until approximately 3.5 hours after the oil was spotted in the boat slip. The court found that the company should have reported the spill immediately to MOE rather than delay the report while it investigated the cause of the spill. By failing to forthwith notify the minister of a discharge of wash oil into the Hamilton Harbour that may impair the quality of the water of any waters, Dofasco Inc. acted contrary to Section 30(2) under the OWRA. The company was found guilty of the single charge and was fined \$60,000 plus a \$15,000 victim fine surcharge, for a total fine of \$75,000.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2016

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: Oct 31, 2014

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: Oct 31, 2016

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2014

Certificates of Approval:

Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Commercial Fuel Oil Tanks:

Provincial [CFOT](#)

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

Government Publication Date: Oct 31, 2016

Chemical Register:

Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: Oct 31, 2016

Compressed Natural Gas Stations:

Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 31, 2012

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: Nov 30, 2016

Certificates of Property Use:

Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: Nov 30, 2016

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: Aug 31, 2015

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Nov 30, 2016

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: Nov 30, 2016

Environmental Compliance Approval:

Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Nov 30, 2016

Environmental Effects Monitoring:

Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Aug 2016

Environmental Issues Inventory System:

Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial EMHE

The Emergency Management Historical Event data class will store the locations of historical occurrences of emergency events. Events captured will include those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance.

Government Publication Date: May 31, 2014

List of TSSA Expired Facilities:

Provincial EXP

This is a list of all expired facilities that fall under the TSSA (TSSA Act & Safety Regulations), including the six regulations that exist under the Fuels Safety Division. It will include facilities such as private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. These tanks have been removed and automatically fall under the expired facilities inventory held by TSSA.

Government Publication Date: Oct 31, 2016

Federal Convictions:

Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: June 2000-Oct 2015

Fisheries & Oceans Fuel Tanks:

Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sept 2003

Fuel Storage Tank:

Provincial **FST**

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

Government Publication Date: Oct 31, 2016

Fuel Storage Tank - Historic:

Provincial **FSTH**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial **GEN**

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Sep 2016

Greenhouse Gas Emissions from Large Facilities:

Federal **GHG**

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013 - Dec 2014

TSSA Historic Incidents:

Provincial **HINC**

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal **IAFT**

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

TSSA Incidents:

Provincial **INC**

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Government Publication Date: Oct 31, 2016

Landfill Inventory Management Ontario:

Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Dec 31, 2013

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2016

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2014

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Aug 2010

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Wells:

Federal

NEBW

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: Dec 31, 2014

Oil and Gas Wells:

Private

OGW

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Jun 2016

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: Oct 31, 2016

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: Nov 30, 2016

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 31, 2016

TSSA Pipeline Incidents:

Provincial PINC

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

Government Publication Date: Oct 31, 2016

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: Nov 30, 2016

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2013

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: Oct 31, 2016

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: Oct 31, 2016

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jan 2016

Wastewater Discharger Registration Database:

Provincial **SRDS**

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-2014

Anderson's Storage Tanks:

Private **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: Jan 31, 2015

TSSA Variances for Abandonment of Underground Storage Tanks:

Provincial **VAR**

The TSSA, under the Liquid Fuels Handling Code and the Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, you may apply to seek a variance from this code requirement. This is a list of all variances granted for abandoned tanks.

Government Publication Date: Oct 31, 2016

Waste Disposal Sites - MOE CA Inventory:

Provincial **WDS**

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Nov 30, 2016

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial **WDSH**

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial **WWIS**

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Jun 30, 2016

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
