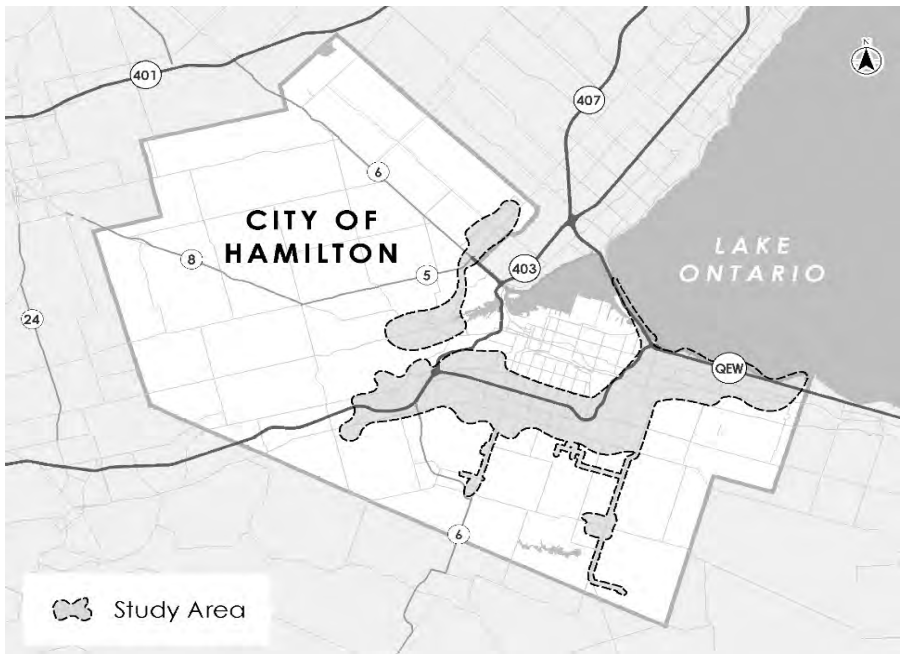
APPENDIX A1

Notice of Study Commencement/PIC No. 1, Agency Response Form and Agency Mailing List

Notice of Study Commencement
and Public Information Centre No.1
New Waste Haulage Receiving Station Schedule 'B'
Municipal Class Environmental Assessment

Project Background

The City of Hamilton has initiated a Schedule 'B' Municipal Class Environmental Assessment (EA) study to determine the preferred location for a new waste haulage receiving station. General locations to be considered during this Class EA study are identified on the study area map below. This study includes public, review agency, and First Nations consultation, evaluation of alternatives, assessment of the impacts of the proposed works, and identification of measures to mitigate any adverse impacts. Upon completion of the study, a Project File Report documenting the planning and decision making process will be prepared and made available for public review.



The Study Process

This Study will follow the planning and design process as defined in the *Municipal Engineers Association Municipal Class Environmental Assessment document (October 2000, as amended in 2007, 2011 & 2015).*

Public Information Centre (PIC) No. 1

Two (2) PIC sessions will be held as part of this study. PIC No. 1 will be held to provide background information and to identify the problems and opportunities that will be addressed through the study. PIC No. 1 is scheduled for:

Date: November 9, 2017
Time: 6:00 pm to 8:00 pm
Location: Canadian Warplane Heritage Museum
9280 Airport Road
Mount Hope, ON

We would like to hear from you

We are interested in hearing any comments or concerns you may have with respect to this study. Comments received through the course of the study will be considered in selecting the preferred solution. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will be become part of the public record. If you would like more information or would like to be placed on the Study mailing list, please contact:

Re: Notice of Commencement and Public Information Centre (PIC) No. 1
New Waste Haulage Receiving Station
Schedule 'B' Municipal Class Environmental Assessment Study

Dear Sir/Madam;

The City of Hamilton has initiated the New Waste Haulage Receiving Station Schedule 'B' Municipal Class Environmental Assessment (EA) Study. The purpose of this Class EA study is to identify a preferred location for a new waste haulage receiving station. General locations to be considered for the new receiving station are outlined on the attached Notice.

We have enclosed for your information a copy of the Notice of Commencement and PIC No. 1 which will appear in the Hamilton Spectator on October 27th and November 3rd, 2017. If your agency/office has any comments or input regarding this project, we invite you to complete and return the attached Response Form by November 24, 2017.

For further information or if you wish to provide input regarding this project, please contact the undersigned at 905-546-2424 ext. 2087 or via email at Sharon.MacPherson-Nemeth@hamilton.ca .

Yours truly,

SMacPherson-Németh

Sharon MacPherson-Németh, B.Tech, C.E.T., PMP
Project Manager

Enclosure: Notice of Study Commencement and PIC No. 1; Response Form

RESPONSE FORM

City of Hamilton
New Waste Haulage Receiving Station
Schedule 'B' Municipal Class Environmental Assessment Study

1. Contact Name: _____

2. Ministry/Agency/Office: _____

3. Address: _____

_____ Postal Code: _____

Phone No.: _____

Email: _____

4. Please provide any relevant information on existing conditions within the study area, identify specific comments and/or concerns, or items that should be considered during the Class EA study (please attach additional sheets if necessary):

_____

_____

_____

_____

_____

5. Do you wish to be notified for continued involvement in the project process, up to and including project implementation? Yes _____ No _____

Signature _____ Date _____

Please return this form to the undersigned by November 24, 2017:

Sharon MacPherson-Németh, B.Tech, C.E.T., PMP
Project Manager
City of Hamilton
77 James Street North, Suite 400
Hamilton, ON L8R 2K3

Phone: 905-546-2424 ext. 2087
Fax: 905-546-4491
Email: Sharon.MacPherson-Nemeth@hamilton.ca

Thank you for your participation in this study.

Municipal Class Environmental Assessment for a New Septage Waste Haulage Receiving Station

The City of Hamilton is interested in hearing the community's comments, questions, concerns and suggestions regarding the New Septage Waste Haulage Receiving Station Class EA. Please take a few minutes to complete this brief comment sheet. All comments will be carefully considered during the Environmental Assessment Process.

1. What is your interest in the study? Are you a:

Waste Haulage Contractor	( )	
Commercial Business Owner	( )	
Resident	( )	
Member of an Interest Group (please specify)	( )	_____
Agency Representative (please specify)	( )	_____
Other (please specify):	( )	_____

2. Do you have any comments related to the **existing septage waste haulage receiving stations** and/ or existing social, cultural, or natural conditions in this study area?

_____

_____

_____

_____

_____

_____

3. Do you have any comments, concerns, questions or suggestions regarding the **evaluation criteria for the new septage waste haulage receiving station location?**

_____

_____

_____

_____

_____

_____

4. Please identify any additional comments related to the project.

WELCOME

New Septage Waste Haulage Receiving Station
Municipal Class Environmental Assessment (Class EA)

Public Information Centre (PIC) No. 1

Thursday November 9th, 2017
6:00pm-8:00pm

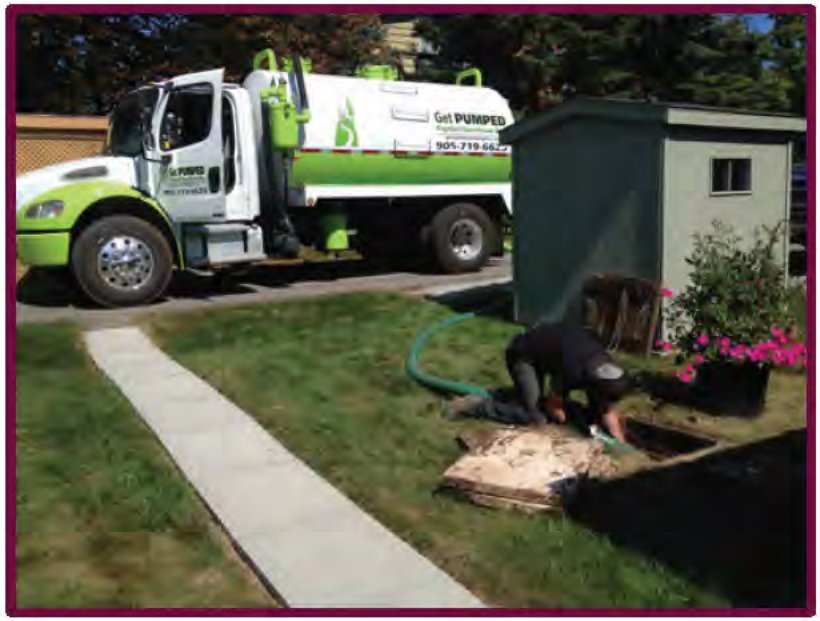
Please **SIGN IN** to stay up-to-date on the study.
Members of the project team are available to answer any questions.

We want to hear from you! Please review the information panels and fill out a comment sheet.

Purpose of Tonight's PIC

The purpose of tonight's PIC is to provide:

- An overview of the Class EA process
- A description of the project, including the Problem Statement, that will define the successful outcome of the study
- An overview of the existing septage waste haulage program and septage waste haulage receiving stations



We would like YOUR FEEDBACK on:

- Evaluation criteria identified for assessing alternative septage waste haulage receiving station locations
- Any relevant information on existing conditions within the study area

Your input is important to us! We encourage you to fill out a comment sheet on the information presented tonight.

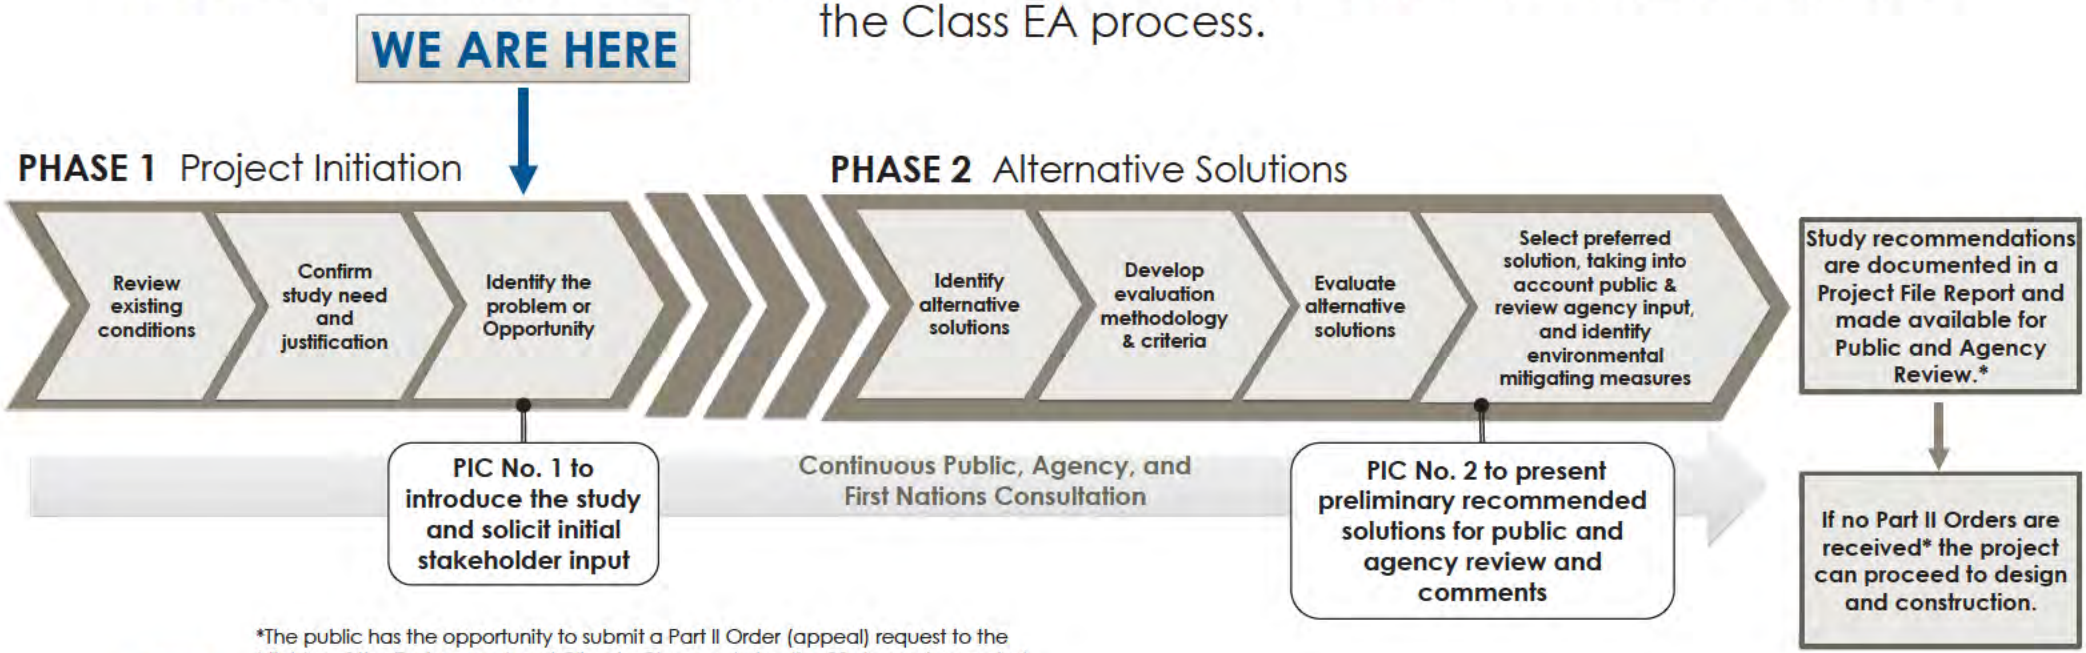
Hamilton Water

Stantec

What is a Municipal Class Environmental Assessment?

A Class EA is an process under the *Ontario Environmental Assessment Act* by which municipalities follow an approved process for the planning and design of municipal infrastructure projects.

This study is being planned as a 'Schedule B' activity, and will follow Phases 1 and 2 of the Class EA process.



*The public has the opportunity to submit a Part II Order (appeal) request to the Minister of the Environment and Climate Change during the 30-day review period to request that the project be elevated to a higher level of investigation. The Minister may deny approve or approve the request with conditions.

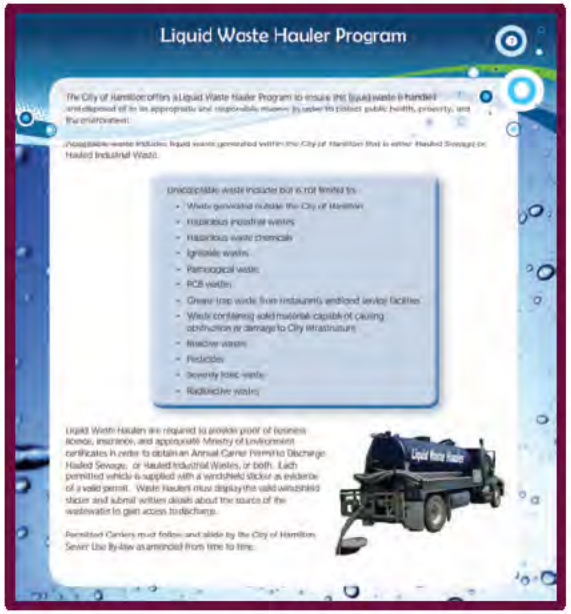
Hamilton Water

Stantec

Septage Waste Haulage Program and Sewer Use By-Law

- The City's Septage Waste Haulage Program regulates the disposal of residential and some industrial liquid waste from throughout the City. Acceptable waste includes:
  - Human sanitary waste including wastes from toilets, showers, wash basins, food preparation sinks, clothes washing operations, etc.; and
  - Non-hazardous waste from agricultural, commercial, industrial or institutional sources.

- The City's Sewer Use By-Law (No. 14-090) regulates, monitors and enforces hauled septage waste and provides:
  - Clearly defined limits for common pollutants;
  - A listing of prohibited substances;
  - Discharge requirements for permitted carriers; and
  - Monitoring standards to control discharges and reduce impacts of spills.



The Sewer-Use Bylaw can be found on the City's website: www.Hamilton.ca

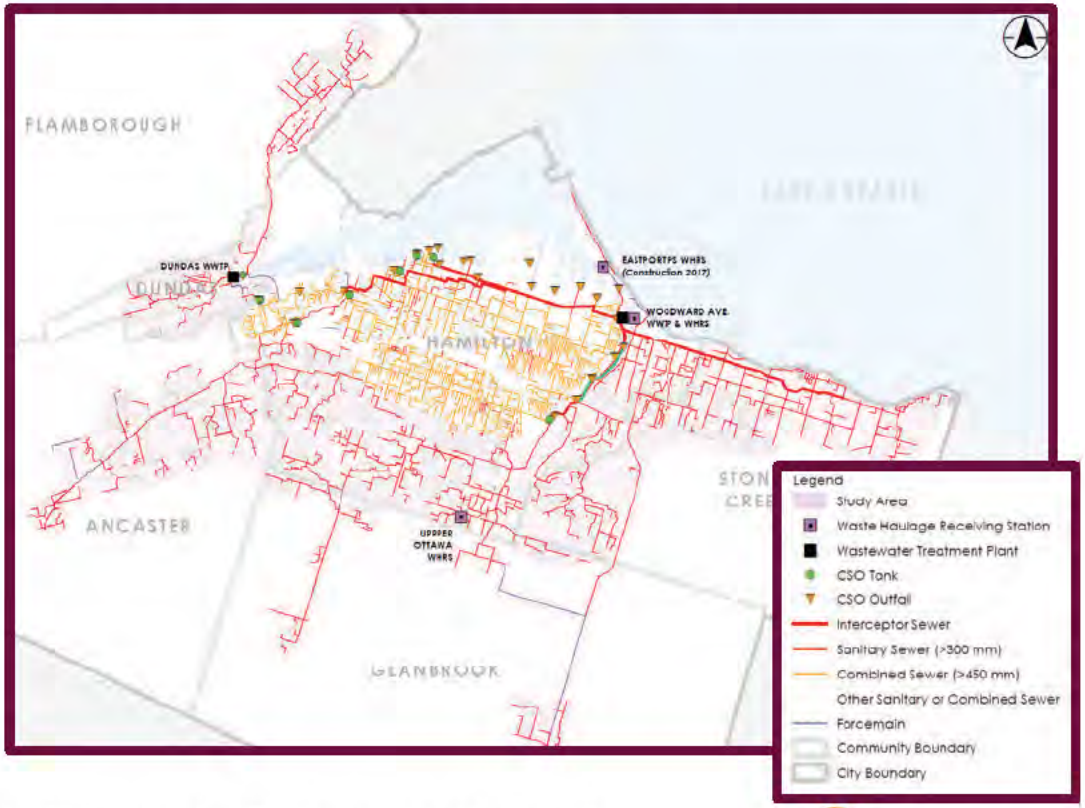
Hamilton Water

Stantec

Existing Septage Waste Haulage Receiving Stations

The City currently operates two (2) Septage Waste Haulage Receiving Stations (SWHRS). Previous studies determined that both stations need to be decommissioned. One (1) new SWHRS is currently under construction at the Eastport Drive Sewage Pumping Station.

- **Upper Ottawa Street (currently in service)**
  - –Surrounded by mainly commercial land uses
  - –Septage waste is discharged directly into the sanitary sewer from the waste hauler, with limited sampling undertaken
  - –Ongoing odour complaints from neighbouring businesses
- **Woodward Avenue (currently in service)**
  - –SWHRS located at the Woodward Wastewater Treatment Plant (WWTP)
  - –The WWTP experiences significant truck traffic associated with WWTP and SWHRS operations
  - –WWTP currently undergoing expansion, and SWHRS facilities need to be decommissioned to accommodate the expansion and operations of the WWTP
- **Eastport Drive Sewage Pumping Station (HC017) and SWHRS (under construction)**
  - –Pumping Station being modified to accept hauled septage waste currently discharging to the Woodward Avenue SWHRS



Hamilton Water

Stantec

Problem Statement

The City currently operates two (2) Septage Waste Haulage Receiving Stations (SWHRS): one at the Woodward Avenue Wastewater Treatment Plant (WWTP) and one at the Mountain Transfer Station on Upper Ottawa Street.

The Woodward Avenue WWTP SWHRS is scheduled to be replaced with a new SWHRS at the Eastport Drive Sewage Pumping Station.

Due to a number of operational challenges and site constraints at the Upper Ottawa Street SWHRS, the City of Hamilton is in need of a new SWHRS to service the southern portion of the City.

The new station should support the objectives of the City's Septage Waste Haulage Program and the Sewer Use By-Law, while minimizing impacts to the social, cultural, and natural environments.

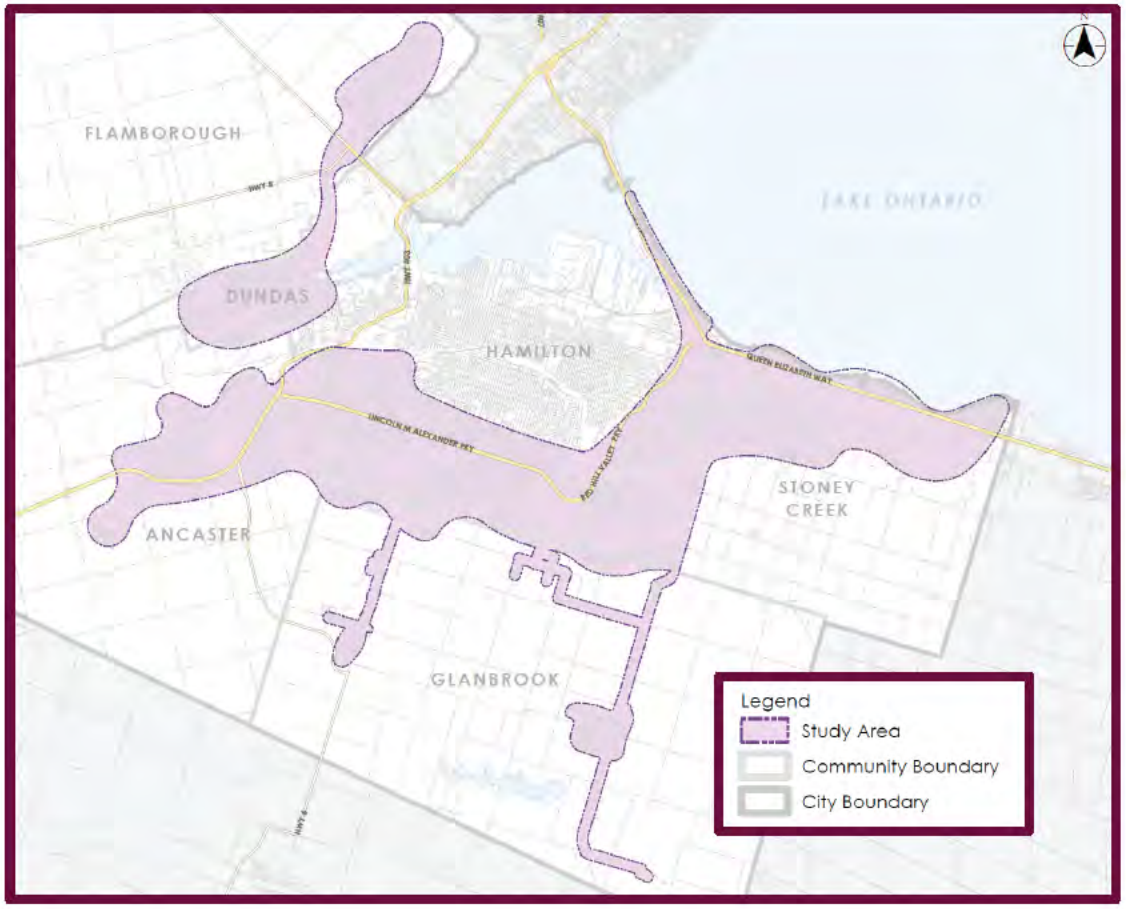
Upper Ottawa Street SWHRS

Hamilton Water

Stantec

Study Area – Potential SWHRS Locations

- The study area includes areas of higher elevation within the City that are serviced by the sanitary sewer system (excluding combined sewers).
- The following will be considered in selecting alternative SWHRS locations:
  - –Access to existing sanitary sewer system with available downstream capacity;
  - –Outside of residential areas;
  - –Proximity/access to major thorough-fares;
  - –Site can accommodate truck traffic including larger haulage trucks; and
  - –Preferably City-owned property.



Hamilton Water

Stantec

Draft Evaluation Criteria

Once alternative locations are identified for the new SWHRS, the following criteria will be used to assess each alternative location:

Socio-Economic and Cultural Environment

- Impacts to adjacent land uses
- Community disruption including increased truck traffic
- Ease of access for waste haulers
- Property acquisition
- Impacts to archaeological resources and built cultural heritage
- Noise impacts

Natural Environment

- Impacts to terrestrial features and habitats, including species at risk
- Impacts to aquatic habitats, including species at risk
- Impacts to soils, groundwater, or surface water features
- Land uses/requirements

Engineering and Technical Considerations

- Available site size to accommodate appropriate driveways and staging areas
- Conveyance and sewage pumping requirements
- Impacts to downstream capacity
- Permits and approvals

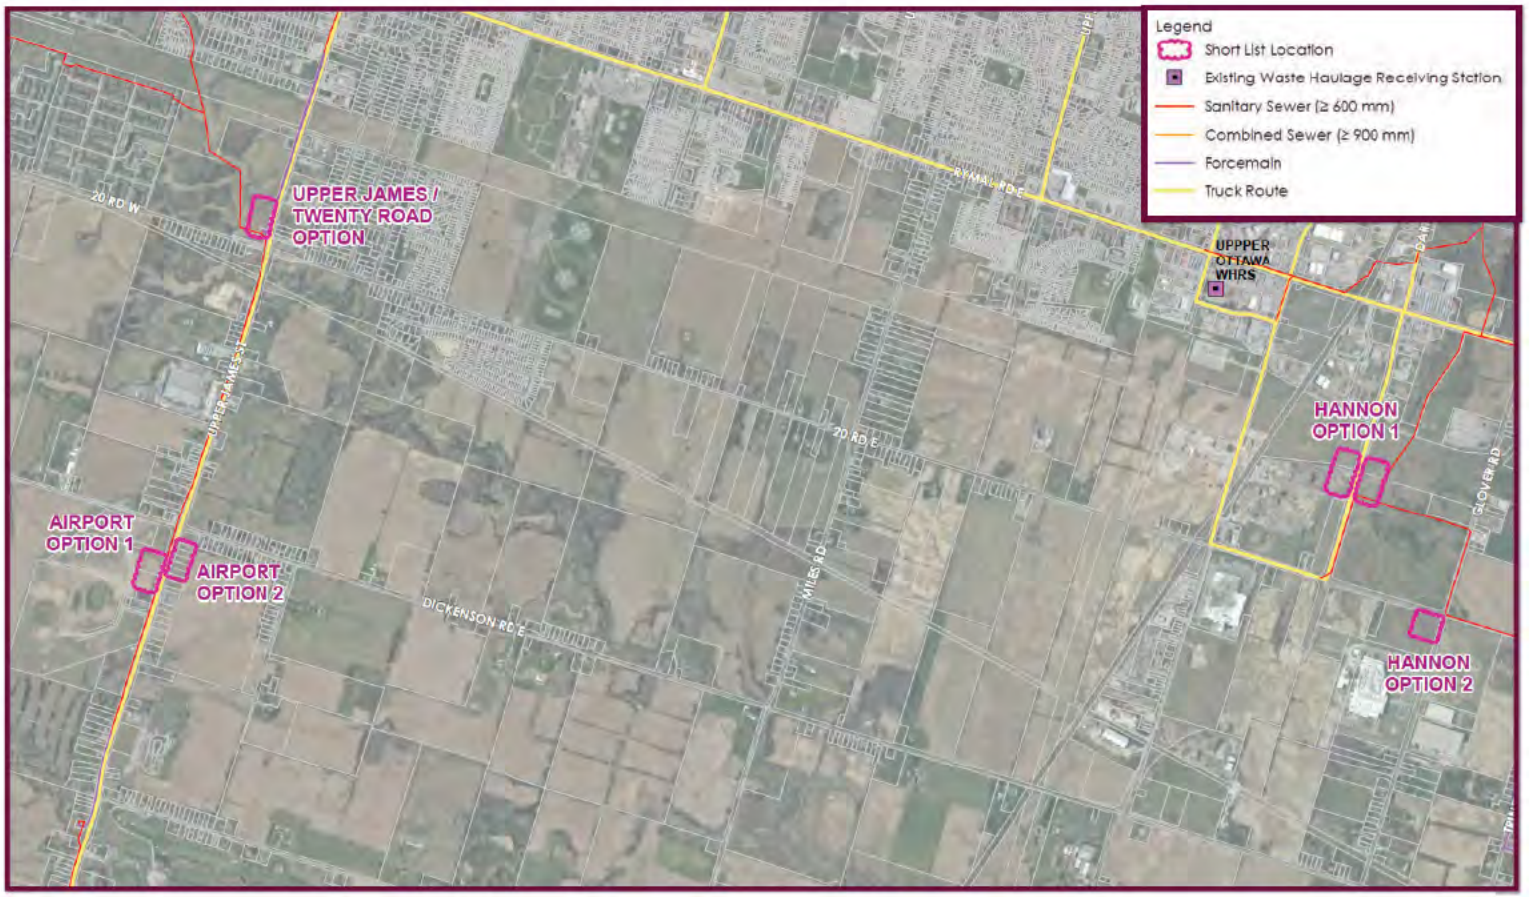
Economic

- Land acquisition costs
- Capital construction costs
- Operation and maintenance costs
- Lifecycle costs (Net Present Value)
- Proximity to service area

Short List of Alternative Sites

The short list of Areas were selected based on:

- Vacant property with no existing land use;
- Land parcel size;
- Proximity to existing sanitary trunk sewer;
- Proximity to designated truck routes;
- Septage waste hauling service areas relative to Eastport PS site



Hamilton Water

Stantec

Existing Conditions – Socio-Economic/ Cultural Environment

As part of the Class EA process, the socio-economic and cultural environments are reviewed. This includes existing and planned land uses within the City of Hamilton Official Plans, developments, built cultural heritage, and archaeology.

Airport Option 1 Facing Southeast

Airport Option 2 Facing West

- Located within the Airport Employment Growth District Secondary Plan Area as "Airport Prestige Business" land use
- Both Options located within an active Development Application
- There are no Built Cultural Heritage Resources on the sites
- Based on the Stage 1 archaeological assessment, there are no areas of archaeological potential on the site.

Upper James/Twenty Road Site Facing Northeast

- Located adjacent to Sanitary Pumping Station HC018
- Designated as Arterial Commercial within the City of Hamilton Official Plan
- In proximity to existing residential land uses
- Located near 1 property listed on the City's Inventory of Buildings of Architectural and Historical Interest.
- Based on the Stage 1 archaeological assessment, the site retains archaeological potential.

Hannon Option 1 Facing Southeast

Hannon Option 2 Facing Southwest

- Sites are designated as Business Park within the City of Hamilton Official Plan
- Option 1 adjacent to existing Asphalt Plant (CoCo Paving)
- Option 2 adjacent to existing industrial plants
- There are no Built Cultural Heritage Resources on the sites
- Based on the Stage 1 archaeological assessment, the sites retain archaeological potential

Hamilton Water

Stantec

protection plan may impact how or where that activity is undertaken. Policies may prohibit certain activities, or they may require risk management measures for these activities. Municipal official plans, planning decisions, Class EA projects (where the project includes an activity that is a threat to drinking water) and prescribed instruments must conform and / or comply with policies that address significant risks to drinking water and must have regard for policies that address moderate or low risks.

As part of the Class EA project, the proponent should clearly document how the proximity of the project to sources of drinking water (municipal or other) and any delineated vulnerable areas was considered and assessed, whether there were any source protection plan policies that applied, and if so, how they impacted the project, as well as identify mitigating measures to address any negative environmental impacts to those sources (considering natural, economic and social/cultural environmental impacts). As you may be aware, in October 2015, the MEA Parent Class EA document was amended to include reference to the Clean Water Act (Section A.2.10.6) and indicates that proponents undertaking a Municipal Class EA project must identify early in their process whether a project is or could potentially be occurring with a vulnerable area. Given this requirement, the proponent should include a section in the project file or environmental study report on source water protection.

While most source protection plans focused on including policies for significant drinking water threats in the WHPAs and IPZs it should be noted that even though source protection plan policies may not apply in HVAs, these are areas where aquifers are sensitive and at risk to impacts and within these areas, activities may impact the quality of sources of drinking water for systems other than municipal residential systems.

In order to determine if this Class EA project is occurring within a vulnerable area, proponents can use this mapping tool: http://www.applications.ene.gov.on.ca/swp/en/index.php The mapping tool will also provide a link to the appropriate source protection plan in order to identify what policies may be applicable in the vulnerable area.

For further information on the maps or source protection plan policies which may relate to their project, proponents should contact the Diane Bloomfield, the project manager for Drinking Water Source Protection at the Halton-Hamilton source protection authority by phone at 905.854.9229 ext.223, or by email at dbloomfield@hrca.on.ca

More Information

For more information on the Clean Water Act, source protection areas and plans, including specific information on the vulnerable areas and drinking water threats, please refer to Conservation Ontario's website where you will also find links to the local source protection plan/assessment report.

A list of the prescribed drinking water threats can be found in section 1.1 of Ontario Regulation 287/07 made under the Clean Water Act. In addition to prescribed drinking water threats, some source protection plans may include policies to address additional "local" threat activities, as approved by the MOECC.

The Crown has a legal duty to consult Aboriginal communities when it has knowledge, real or constructive, of the existence or potential existence of an Aboriginal or treaty right and contemplates conduct that may adversely impact that right. Before authorizing this project, the Crown must ensure that its duty to consult has been fulfilled, where such a duty is

triggered. Although the duty to consult with Aboriginal peoples is a duty of the Crown, the Crown may delegate procedural aspects of this duty to project proponents while retaining oversight of the consultation process.

Your proposed project may have the potential to affect Aboriginal or treaty rights protected under Section 35 of Canada's *Constitution Act* 1982. Where the Crown's duty to consult is triggered in relation to your proposed project**, the MOECC is delegating the procedural aspects of rights-based consultation to you through this letter.** The Crown intends to rely on the delegated consultation process in discharging its duty to consult and maintains the right to participate in the consultation process as it sees fit.

Steps that you may need to take in relation to Aboriginal consultation for your proposed project are outlined in the "Code of Practice for Consultation in Ontario's Environmental Assessment Process" which can be found at the following link:
https://www.ontario.ca/document/consultation-ontarios-environmental-assessment-process
Additional information related to Ontario's Environmental Assessment Act is available online at:
www.ontario.ca/environmentalassessments

You must contact the Director of Environmental Approvals Branch under the following circumstances subsequent to initial discussions with the communities identified by MOECC:

- Aboriginal or treaty rights impacts are identified to you by the communities
- You have reason to believe that your proposed project may adversely affect an Aboriginal or treaty right
- Consultation has reached an impasse
- A Part II Order request or elevation request is expected

The Director of the Environmental Approvals Branch can be notified either by email with the subject line "Potential Duty to Consult" to EAASIBgen@ontario.ca or by mail or fax at the address provided below:

Email:	EAASIBGen@ontario.ca Subject: Potential Duty to Consult
Fax:	416-314-8452
Address:	Environmental Approvals Branch 135 St. Clair Avenue West, 1st Floor Toronto, ON, M4V 1P5

The MOECC will then assess the extent of any Crown duty to consult for the circumstances and will consider whether additional steps should be taken, including what role you will be asked to play in them.

Sharon,

Please see our response form attached.
Please also note that many of the natural hazard lands in the project study area are included in our regulated area mapping that is available on our website at http://conservationhamilton.ca/regulated-areas-map-tool/
This may be of assistance in the selection of preferred sites.

Sharon,

This is in reply to your notice of Oct 23, 2017, as attached, which I received today.

I had a quick look of the general locations shown on the Schedule B. We understand the purpose of this Class EA study is to select a preferred location for a new waste haulage receiving station. Hydro One has facilities within the study area. However we are not able to tell you which/where impact would be as the study area is too broad. Please continue to keep Hydro One informed of this project by sending further notices to my attention, see my contact info below.

Should you have questions, do not hesitate to give me a call.
Thanks,

Subject: RE: New Waste Haulage Receiving Station EA
Date: Monday, October 30, 2017 12:39:17 PM
Attachments: image001.png

Thanks for your reply Sharon.

As clarification, I understand that the majority of prime agricultural land in Hamilton is serviced by septic systems and therefore, not attached to the separated sanitary sewer system but the Ministry of Agriculture, Food and Rural Affairs is concerned with the protection of agricultural land and farming from non-agricultural development. Thus, I was asking if the study area for this project specifically excluded prime agricultural areas, as identified in the City's Official Plan. From an agricultural perspective, it is preferable that non-agricultural land uses, including those proposed as part of this study, **not** be located on agricultural land or adversely impact agricultural operations.

Please confirm if agricultural considerations were taken into account as part of the study area definition and if so, how. I am also interested to know if the study area includes prime agricultural areas (as identified in the City's Official Plan) or not.

Thank you for your help.

Jackie

Subject: New Waste Haulage Receiving Station EA

Good Morning Jackie,

Thank you for your voicemail message.

With regard to your question about the attached study area map provided in the notice, as a starting point we included all areas of the City that are serviced by a separated sanitary sewer system.

We have specific criteria that will be used to further screen potential sites including:

- Sites with access to existing sanitary sewer system with available downstream capacity;
- Locations outside of residential areas;
- Proximity/access to major thorough-fares;
- Site can accommodate truck traffic including larger haulage trucks; and

- Preferably City owned property.

Once the project progresses we will have a shorter list of potential sites that you can review and comment on. The majority of our prime agricultural land in Hamilton is serviced by septic systems and therefore, not attached to our separated sanitary sewer system.

I will be happy to send you the Public Information Centre display boards after the November 9th event.

If you have any additional questions, please do not hesitate to contact me.

Kind Regards,

Sharon MacPherson-Németh, B.Tech, C.E.T, PMP

New Waste Haulage Receiving Station
Schedule 'B' Municipal Class Environmental Assessment Study

1. Contact Name: Jackie Van de Valk
2. Ministry/Agency/Office: Ontario Ministry of Agriculture, Food & Rural Affairs
3. Address: 10-6484 Wellington Rd. 7, Elora, ON
   Postal Code: N0B 1S0
   Phone No.: 519-846-3415
   Email: jackie.vandevalk@ontario.ca
4. Please provide any relevant information on existing conditions within the study area, identify specific comments and/or concerns, or items that should be considered during the Class EA study (please attach additional sheets if necessary):

Based on my Nov. 16, 2017 discussion with Mike Kocher (Project Mgr. with Stantec) it is understood that land designated in the City of Hamilton Official Plan as "Agriculture" or "Specialty Crop" will not be considered as potential locations for a new waste haulage receiving station. My answer to question 5 (below) is based on this being true. If something changes with respect to consideration of agricultural areas, please advise. Thanks!

5. Do you wish to be notified for continued involvement in the project process, up to and including project implementation? Yes _____ No ✓

RE: MTCS file #: 0007866
Proponent: City of Hamilton
Subject: Notice of Commencement/Public Information Centre No. 1
New Waste Haulage Receiving Station
Municipal Class Environmental Assessement ó Schedule Bô
Location: Hamilton, Ontario

Dear Sharon MacPherson-N®meth,

Thank you for providing the Ministry of Tourism, Culture and Sport (MTCS) with the Notice of Commencement and Public Information Centre for your project. MTCSôs interest in this Environmental Assessment (EA) project relates to its mandate of conserving Ontarioôs cultural heritage, which includes:

- Archaeological resources, including land-based and marine;
- Built heritage resources, including bridges and monuments; and,
- Cultural heritage landscapes.

Under the EA process, the proponent is required to determine a projectôs potential impact on cultural heritage resources.

While some cultural heritage resources may have already been formally identified, others may be identified through screening and evaluation. Indigenous communities may have knowledge that can contribute to the identification of cultural heritage resources, and we suggest that any engagement with Indigenous communities includes a discussion about known or potential cultural heritage resources that are of value to these communities. Municipal Heritage Committees, historical societies and other local heritage organizations may also have knowledge that contributes to the identification of cultural heritage resources.

Realizing that this a large scale EA project, developing or reviewing inventories of known and potential cultural heritage resources within the study area can identify specific resources that may play a significant role in guiding the evaluation of alternatives in the final report.

Archaeological Resources
MTCS recommends using the City of Hamilton's Archaeology Master Plan to evaluate the potential locations of alternatives with respect to areas of archaeological potential and known archaeological sites.

When the preferred alternatives are identified, you should screen the project with the MTCS *Criteria for Evaluating Archaeological Potential* to determine if an archaeological assessment is needed. If the sites exhibit archaeological potential, then an archaeological assessment (AA) should be undertaken by an archaeologist licensed under the *Ontario Heritage Act*, who is responsible for submitting the report directly to MTCS for review. MTCS archaeological sites data are available at archaeologicalsites@ontario.ca.

Built Heritage and Cultural Heritage Landscapes
Your EA project may have the potential to impact cultural heritage resources. You can refer to Hamiltonís Heritage Volumes 1 and 2 to help inform your initial screening. Once you have identified the prefered locations for your EA project, the MTCS *Criteria for Evaluating Potential for Built Heritage Resources and Cultural Heritage Landscapes* checklist should be completed to help determine whether your EA project will impact cultural heritage resources. The Clerk for The City of Hamilton can provide up to date information on property registered or designated under the *Ontario Heritage Act*. Municipal Heritage Planners can also provide information that will assist you in completing the checklist.

If potential or known heritage resources exist, MTCS recommends that a Heritage Impact Assessment (HIA), prepared by a qualified consultant, should be completed to assess potential project impacts. Our Ministryís *Info Sheet #5: Heritage Impact Assessments and Conservation Plans* outlines the scope of HIAs. Please send the HIA to MTCS and the heritage planning staff at the City of Hamilton for review, and make it available to local organizations or individuals who have expressed interest in review.

Environmental Assessment Reporting
All technical heritage studies and their recommendations are to be addressed and incorporated into EA projects. Please advise MTCS whether any technical heritage studies will be completed for your EA project, and provide them to MTCS before issuing a Notice of Completion. If your screening has identified no known or potential cultural heritage resources, or no impacts to these resources, please include the completed checklists and supporting documentation in the EA report or file.

Thank you for consulting MTCS on this project, and please continue to do so through the EA process. If you have any questions or require any clarification, please contact Karla Barboza (Team Lead, Heritage) at 416-314-7120 or at karla.barboza@ontario.ca

Sincerely,

Daniel de Moissac
Heritage Planner (Acting)
Ministry of Tourism, Culture and Sport
daniel.demoissac@ontario.ca

Copied to: Karla Barboza, MTCS

It is the sole responsibility of proponents to ensure that any information and documentation submitted as part of their EA report or file is accurate. MTCS makes no representation or warranty as to the completeness, accuracy or quality of the any checklists, reports or supporting documentation submitted as part of the EA process, and in no way shall MTCS be liable for any harm, damages, costs, expenses, losses, claims or actions that may result if any checklists, reports or supporting documents are discovered to be inaccurate, incomplete, misleading or fraudulent.

Please notify MTCS if archaeological resources are impacted by EA project work. All activities impacting archaeological resources must cease immediately, and a licensed archaeologist is required to carry out an archaeological assessment in accordance with the Ontario Heritage Act and the Standards and Guidelines for Consultant Archaeologists.

If human remains are encountered, all activities must cease immediately and the local police as well as the Registrar, Burials of the Ministry of Government and Consumer Services (416-326-8800) must be contacted. In situations where human remains are associated with archaeological resources, MTCS should also be notified to ensure that the site is not subject to unlicensed alterations which would be a contravention of the Ontario Heritage Act.

Subject: Notice of Commencement, New Waste Haulage Receiving Station, Schedule 'B' Municipal Class Environmental Assessment Study

Hello Sharon,
The Grand River Conservation Authority (GRCA) has now received the Notice of Commencement for a New Waste Haulage Receiving Station Municipal Class E.A. This e-mail is to advise you that the GRCA is interested in participating in the Environmental Assessment study. I will act as your contact at the GRCA.

A number of the potential sites are located in the GRCA's Watershed and within some of those sites there will be features that are potentially regulated and of interest to the GRCA. As the screening process for the identification of a preferred location is refined, the GRCA would appreciate the opportunity to provide more specific comments.

I trust this is of assistance.
Regards,

Drew Cherry

Sharon,

This is in reply to your notice of Oct 23, 2017, as attached, which I received today.

I had a quick look of the general locations shown on the Schedule B. We understand the purpose of this Class EA study is to select a preferred location for a new waste haulage receiving station. Hydro One has facilities within the study area. However we are not able to tell you which/where impact would be as the study area is too broad. Please continue to keep Hydro One informed of this project by sending further notices to my attention, see my contact info below.

Should you have questions, do not hesitate to give me a call.

Subject: RE: New Septage Waste Haulage Receiving Station EA

Sharon,

I assume from the maps enclosed that the preferred site for the new facility is strictly on the west side of Dartnall Road. Development on the east side of Dartnall Rd. would not be possible due to the presence of Hannon Creek and associated floodplain and erosion hazards. Further details regarding the watercourse can be obtained from the City of Hamilton document *Upper Hannon Creek Master Drainage*

Subject: RE: New Septage Waste Haulage Receiving Station EA

Good Morning Darren,

As required under the Municipal Class Environmental Assessment (MCEA) process, we have scheduled our second Public Information Centre (PIC) for September 19th, 2018. PIC #2 will provide an overview of the evaluation of alternative site locations and the **preliminary recommended solution for public and agency review and comment**. Once PIC #2 has been held, the PIC display boards will be uploaded to our project webpage. We do not release draft information to agencies and the public on our website.

The Hamilton Conservation Authority will have ample opportunity to review all of the PIC #2 materials and provide comments. Additionally, the HCA will also be able to comment once the Project File Report has been finalized and the 30 day review period has commenced (we are months away from finalizing the report since we continue to gather feedback from agencies and the public).

PIC #2 materials will be available on our project webpage next week: https://www.hamilton.ca/city-planning/master-plans-class-eas/new-septage-waste-haulage-receiving-station-ea

If you have any questions or concerns once you have reviewed the materials, please let us know.

Kind Regards,

Sharon MacPherson-Németh, B.Tech, C.E.T, PMP

Subject: New Septage Waste Haulage Receiving Station EA

Sharon,

Our office received the notice for PIC No. 2, but we have not received any further information or details regarding the project since the PIC No. 1 notification and there is no information available on the City of Hamilton website.
As a formal commenting agency to the City for planning applications and municipal EAs and as an agency that has development regulations governing development in and adjacent to natural hazard areas, our office should be circulated details regarding the EA project for input and formal comment.

Can you please provide further information on the EA process to date (i.e. site selection process, etc.) to our office or provide a link to the project details for our review prior to providing comment?

Thank you

Hello Sharon,
We are going on vacation and I am running out of time trying to get last minute jobs done, however, I wanted to send my comments to you post PIC meeting.
Question 1. Resident and member of the Hamilton East Mountain community Group.

Question 2. Upper Ottawa-/Rymal Rd area and to the East is developing exponentially in Housing development etc.
The area should not be considered for this type of development. Families, schools, pollution, emissions etc.

Question 3. No.

Question 4. Locations should be out in the Country far away as possible from homes, schools etc.

The back of the Mountain and and may be to the west because of housing development etc. in the east.

Near major highways and not near the Escarpment. ? Highway 6. Areas beyond the Airport / Caledonia may be a possibility?

Planned industrial areas that the City of Hamilton may already own.

Higher elevation if possible as suggested by presentation documentations.

Question 5. Very useful PIC.

Question 6. The location was good .

Explanations of the study was very well done.

Staff available for questions, feedback etc.

I could not find the PIC sheet on the City's computer and I was unable to fax it.
I hope this information helps.

With good wishes.

Thank you.

Subject: MNCFN Response to Septage Waste Haulage Station

Dear Sharon,

Thank you for the notification sent to The Mississaugas of the New Credit First Nation (MNCFN) regarding *the Septage Waste Haulage Station*. We have reviewed the document you have provided and determined that, at this time, MNCFN has a **low level** of concern about the project. ***Please see the attached letter for more information***.

Respectfully, we ask that you immediately notify MNCFN if there are any changes to the project as they may impact MNCFN's interests. Additionally, MNCFN requests a copy of all associated environmental and/or archaeological reports. These can be electronic copies, if you prefer. Furthermore, MNCFN employs Field Liaison Representatives who **must** be on location whenever any fieldwork for environmental and/or archaeological assessments is undertaken. If additional work is scheduled, please notify us as soon as possible so that we may work together to discuss and arrange for MNCFN's participation.

Sincerely,

Fawn D. Sault

December 20, 2018

Dear Sharon,

We are the Mississaugas of the New Credit First Nation (MNCFN), the descendants of the Mississaugas of the River Credit. Our traditional territory extends from the Rouge River Valley in the east, across to the headwaters of the Thames River, down to Long Point on Lake Erie, and back along the shores of Lake Erie, the Niagara River, and Lake Ontario to the Rouge River Valley. It encompasses present-day London, Hamilton, and Toronto, as well as our communal lands. Our traditional territory has defined and sustained us as a First Nation for countless generations, and must continue to do so for all our generations to come.

Thank you for your notification on *the Notice of Public Information Centre for the New Septage Waste Haulage Receiving Station Schedule B Municipal Class EA Study* dated September 7, *2018*. The Mississaugas of the New Credit First Nation (MNCFN) has various treaty rights across its traditional territory, including the area contemplated by your project. For further information, please see our website, http://www.newcreditfirstnation.com/. MNCFN continues to exercise treaty rights which include, but are not limited to, rights to harvest, fish, trap and gather species of plants, animals and insects for any purpose including food, social, ceremonial, trade and exchange purposes. The MNCFN also has the right to use the water and resources from the rivers, creeks and lands across the MCNFN traditional territory.

At this time, MNCFN *does not* have a high level of concern regarding the proposed project and therefore, by way of this letter, approves the continuation of this project. However, MNCFN requests that you continue to notify us about the status of the project. **In addition, we**

respectfully ask you to immediately notify us if there are any changes to the project as they may impact MNCFN's interests and that you please provide us with a copy of all associated environmental and archaeology reports. This includes, but is not limited to changes related to the scope of work and expected archaeological and environmental impacts.

Additionally, MNCFN employs Field Liaison Representatives ("FLRs") to act as official representatives of the community and who are answerable to MNCFN Chief and Council through the Department of Consultation and Accommodation. The FLRs' mandate is to ensure that MNCFN's perspectives and priorities are considered in the field and to enable MNCFN to provide timely, relevant, and meaningful comment on the Project. Therefore, **it is MNCFN policy that FLRs are on location whenever any fieldwork for environmental and/or archaeological assessments are undertaken.** It is expected that the proponent will cover the costs of this FLR participation in the fieldwork. Please also provide the contact information of the person, or consultant, in charge of organizing this work so they may facilitate the participation of the MNCFN FLRs.

Nothing in this letter shall be construed as to affect the Aboriginal or Treaty rights and hence shall not limit any consultation and accommodation owed to MNCFN by the Crown or any proponent, as recognized by section 35 of the Constitution Act, 1982.

MNCFN reserves the right in relation to any development project or decision, to decide whether it supports a project and to: comment to regulators, participate in regulatory processes and hearings, seek intervener funding or status, or to challenge and seek remedies through the courts.

MNCFN expects all proponents to act according to the following best practices:

- Engage early in the planning process, before decisions are made
- Provide information in meaningful and understandable formats.
- Convey willingness to transparently describe the project and consider any MNCFN concerns.
- Recognize the significance of cultural activities and traditional practices of the MNCFN
- Demonstrate a respect for MNCFN knowledge and uses of land and resources.
- Understand the importance of youth and elders in First Nation communities.
- Act with honour, openness, transparency and respect.
- Be prepared to listen and allow time for meaningful discussion.

Sincerely,

Fawn D. Sault
