Dear Mr. Wang:

Re: Elevated Water Storage Facility and Pumping Station Municipal Class EA for Pressure District 7 COMMUNICATIONS AND CONSULTATION PLAN

For your review, please find attached the Communications and Consultation (C&C) Plan for the Pressure District (PD) 7 Elevated Water Storage Facility and Pumping Station Municipal Class Environmental Assessment (EA) and Conceptual Design study.

Should you have any questions or require additional information, please feel free to contact me at 416-697-3161 or via email at jwhittard@coleengineering.ca.

Yours truly,

COLE ENGINEERING GROUP LTD.

Jennifer Whittard, B.E.S., PMP
Senior Environmental Planner

Appendix B	Notice of PIC #1
Appendix C	Indigenous Communities Mapping

1 Introduction

1.1 Background

The City of Hamilton has identified the need for a new elevated water storage facility in Pressure District (PD) 7 to ensure security of supply and balancing of the water system. The City has also identified the need for a new booster pumping station to meet future 2041 growth requirements in the southeast mountain area, in addition to providing redundancy for the existing system.

In order to address the above, the City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) study to identify and evaluate alternative siting options for the proposed elevated water storage facility and booster pumping station. The study is being undertaken as a Schedule B Class EA in accordance with the Municipal Engineers Association (MEA) Municipal Class EA document (October 2000, as amended in 2007, 2011 & 2015).

The Schedule B Class EA process includes public and agency consultation, evaluation of alternative siting options, assessment of the potential environmental effects of the project, and identification of reasonable measures to mitigate any adverse effects. Upon completion of the Class EA study, a Project File Report will be prepared and made available for public review for 30-calendar days, with a Notice of Study Completion published in local newspapers to announce the review period.

1.2 Purpose and Approach

This Communication and Consultation (C&C) Plan is an important component of the Class EA process. The purpose of the Plan is to provide a framework for informing and obtaining input from potentially interested and affected stakeholders during the course of the study. The methods prescribed in this Plan will fulfill the notification and consultation requirements of the MEA Municipal Class EA document.

In planning the C&C program our overall approach is to:

- Build on past communication protocols and/or consultation plans from previous Class EA studies and municipal planning initiatives to ensure consistency and continuity;
- Meet public and agency notification and consultation requirements for Phases 1 and 2 of the MEA Municipal Class EA;
- Ensure sufficient consultation with key agencies and stakeholders, e.g., Niagara Peninsula Conservation Authority (NPCA), Hamilton Conservation Authority (HCA), Ministry of the Environment and Climate Change (MOECC), utilities, and affected landowners or businesses, having regard to their interests, information requirements and decision-making processes and schedules;
- Identify opportunities to coordinate public consultation activities (e.g., Public Information Centres) with other City Municipal Class EA projects occurring in the same project area, as applicable (e.g., Elfrida Growth Area Study); and
- Complete additional tasks, where necessary and agreed upon, to enhance the proposed consultation program and overall Class EA process.

1.3 Goals and Objectives

The primary goal of this Plan is to facilitate meaningful consultation with interested and affected stakeholders so that they can have input in the decision-making process and thereby contribute to the

study outcome. More specifically, our main objective is to encourage two-way communication with the community, regulatory agencies, and City staff. To this end, the methods described throughout this report are intended to meet the following goals and objectives:

- Ensure the general public, City staff and Councillors, external agencies (including federal and provincial) and special interest groups are aware of the proposed infrastructure project and have ample opportunity to participate in the planning process;
- Ensure that clear, concise, factual information is provided to all potentially interested and affected stakeholders at key stages of the study process so that they can become meaningfully involved if they so wish;
- Make early contact with external agencies to collect pertinent technical information and ultimately obtain legislative or regulatory approvals in principle, where applicable;
- Solicit stakeholder and City staff input before key decisions are made;
- Identify any issues or concerns brought forward, objectively consider those issues or concerns, and if possible, resolve them prior to study completion;
- Adequately document *all* communications and consultation to assist the City in the resolution of any Part II Order requests; and ultimately,
- Meet and exceed the Municipal Class EA Schedule B consultation requirements.

2 Communication Plan

2.1 Stakeholder Mailing List

A preliminary list of relevant regulatory agencies, municipal departments, utilities, First Nations and residents/businesses to be consulted during the study has been compiled and can be found in **Appendix A**. Our preliminary list of regulatory agencies includes, among others, the MOECC, NPCA, HCA, school boards, utilities/service providers (e.g., Bell, Enbridge, Cogeco – contact information to be confirmed) and First Nations. As the project proceeds and the study area profile is further refined, it is anticipated that this list will grow to include adjacent property owners, major businesses, schools, places of worship, and/or special interest groups.

Where possible, all individuals listed will be contacted by email throughout the course of the study and all email records will be retained. COLE will maintain the mailing list throughout the duration of the study. In addition, initial communications mailed to property owners will be addressed to the “owner or current occupant” until such time that the owner’s name is confirmed (i.e., a response is received).

2.2 Study Area and Notification Limits

In addition to notifying the general public through newspaper notices, it is recommended that specific property owners surrounding the proposed elevated tank and booster pumping station siting options (i.e., within approximately 200 m) be included on the stakeholder mailing list to receive all project notices. This recognizes the potential for negative land use impacts from the planned elevated tank (e.g., disruption to surrounding residents, businesses and local roads) and the need to directly engage adjacent residents, businesses and the general public.

Property owner contact information (e.g., assessment roll number and civic address) should be requested through the City of Hamilton GIS Department, and initial communications will be addressed to the “owner or current occupant” until the owner’s name is confirmed.

Figure 1 presents the study area.

2.3 Notice of Study Commencement & Public Information Centre #2

COLE had previously prepared a draft *Notice of Study Commencement & Public Information Centre (PIC) #1* to announce the study, describe the purpose of the project, and invite potentially interested stakeholders to attend the first PIC. However, it was later advised that the City would include this project in the notice for the Elfrida Growth Area Study (see **Appendix B**). As such, the draft Notice of PIC#1 was not published.

The second contact point of the Class EA process will be the Notice of PIC #2. It is anticipated that similar to the first PIC, the notice will be coordinated with publication of another notice for the Elfrida Growth Areas Study, however, to clearly meet the requirements of the Municipal Class EA, it is recommended that a separate notice be distributed for this project. This notice will invite all those on the stakeholder mailing list, including potentially affected property owners, to attend the PIC to review the alternative elevated water storage facility and booster pumping station siting options and their evaluation, the recommended site(s), and the proposed mitigative measures. It is expected that the City will arrange for publication of the notice in two separate editions of the Hamilton Spectator, as per the requirements of the Class EA document, and cover any associated costs.

COLE will distribute the notice, via email where possible, to those stakeholders identified on the project mailing list. Custom letters to provide additional information will be included where appropriate (e.g., NPCA, HCA, various utilities, etc.). It is proposed that these letters will be issued by COLE on behalf of the City, on COLE letterhead. COLE will also prepare a separate cover letter to adjacent property owners for distribution via Canada Post.

COLE will maintain a file of all correspondence sent and received which will be appended to the final Project File Report. Personal/identifying public information will be obscured (redacted).

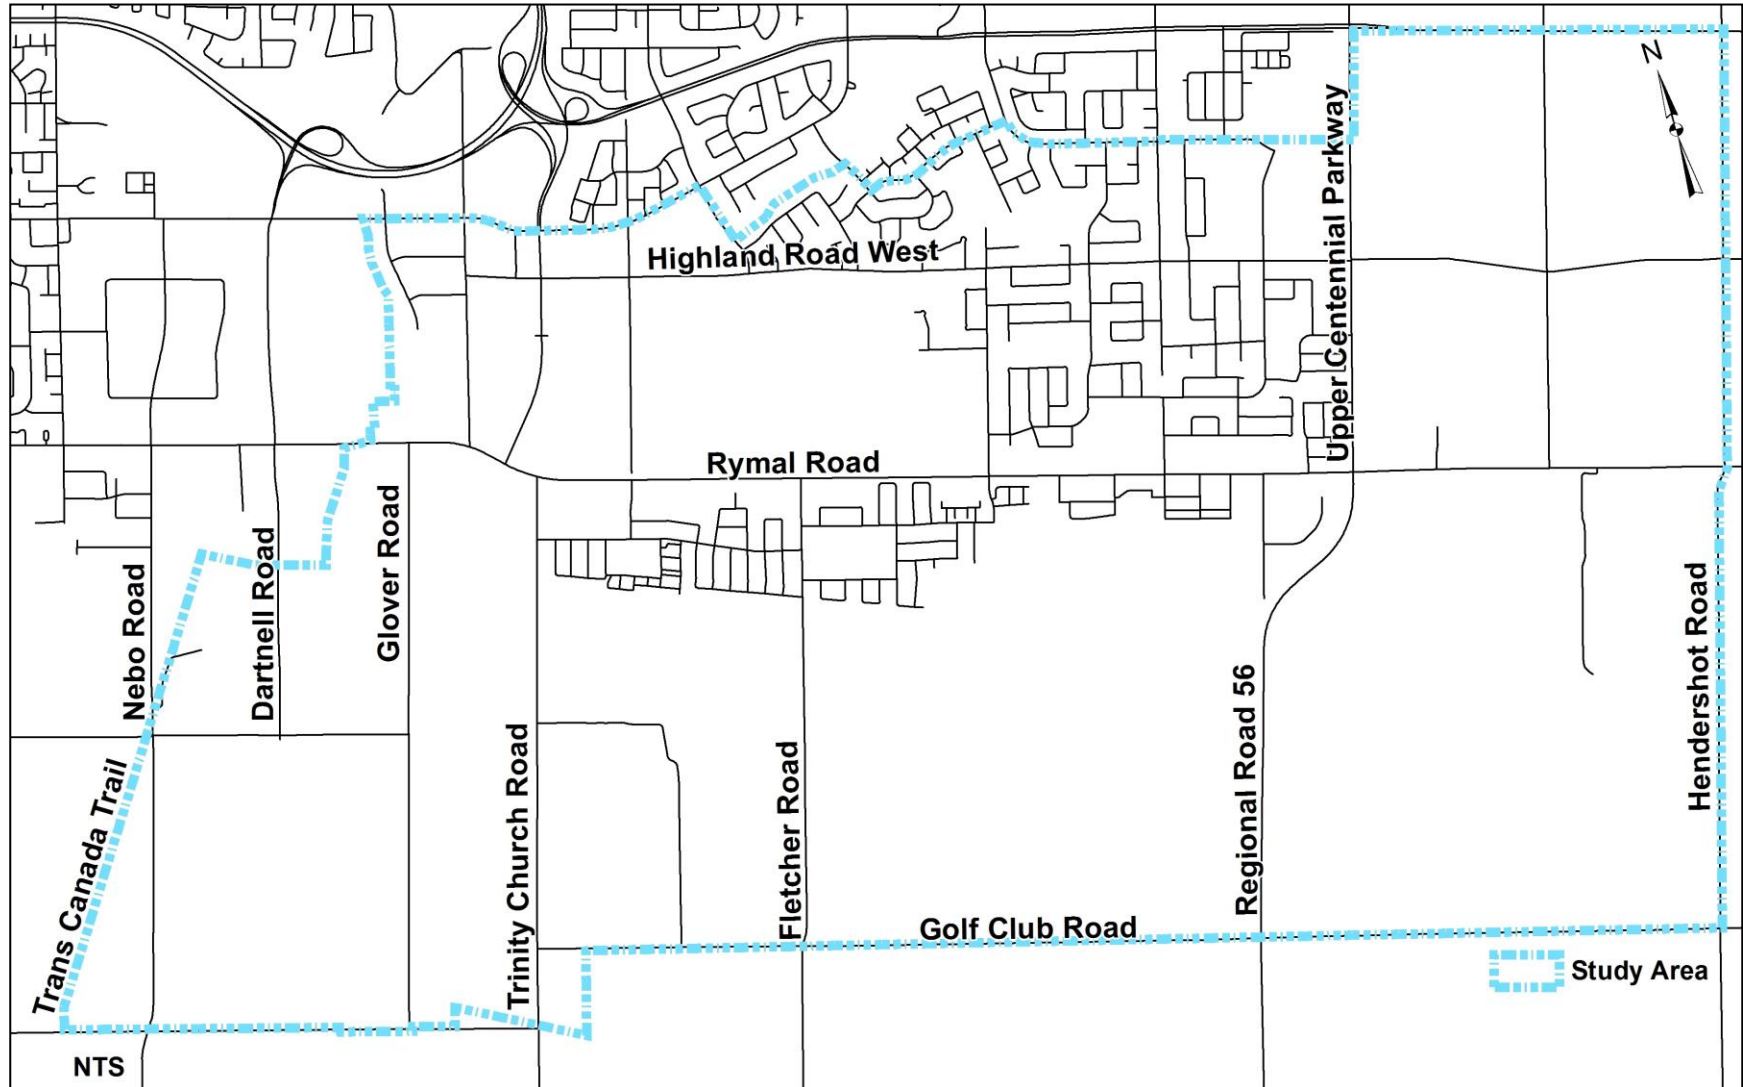

2.4 Notice of Study Completion

A *Notice of Study Completion* will be prepared and distributed via the same means as the previously described notice. The purpose of the notice will be to announce the study completion and commencement of the 30-day public review period for the final Project File Report. The Notice of Study Completion will note that copies of the final Project File Report will be made available in hard-copy for the 30-day review period at multiple locations, including but not limited to, the City of Hamilton Clerk's Department and the Turner Park Library located at 352 Rymal Road East, Hamilton. It is also recommended that secured PDF files of the final Project File Report be made available for review on the City's project website.

2.5 Project Website

It is recommended that the City host a dedicated project webpage for this project. All communication materials such as notices, PIC display boards, comments sheets, and the final Project File Report should be posted. The project webpage URL would be included on the public notices.

Figure 1 Study Area for the Proposed Elevated Water Storage Facility and Booster Pumping Station

3 Consultation Plan

In addition to project team meetings with the City of Hamilton, we have allotted up to two PICs and four stakeholder meetings as further described below.

3.1 Public Information Centres

Two PICs are planned for this study, the first of which was already held jointly with the Elfrida Growth Area Study on December 6, 2017. The purpose of the PICs are to provide stakeholders with an opportunity to review project information and discuss any questions or comments they may have with the Project Team.

The purpose of PIC #1 was to present project background information, the problem and opportunity statement, existing conditions, as well as the proposed elevated tank and pumping station siting options. The purpose of PIC #2 will be to present the evaluation of siting options, the recommended site for the elevated water storage facility and pumping station, construction methods, and proposed mitigation measures. COLE will prepare easy-to-understand display materials (large format boards), sign-in and comments sheets for the City's approval. Members of the Project Team from both the City and COLE will be present at the PIC to discuss project details, answer any questions, or address issues/concerns.

Following both PICs, COLE will prepare PIC summaries to document the questions and comments received during and after the PICs. The summaries will be included in the Project File Report. Written responses to comment sheets, emails, and other forms of correspondence will be prepared by COLE and reviewed by the City, prior to distribution.

With respect to the PIC venue, time and date, it is anticipated that this will be again coordinated with the Elfrida Growth Areas Study at the discretion of the City.

3.2 Stakeholder Committee Meetings

It is anticipated that up to four stakeholder meetings will be conducted as part of the study. It is envisioned that the stakeholder committee will consist of key regulatory agencies such as the Ministry of Natural Resources and Forestry (MNRF), NPCA and HCA and others, as applicable. The purpose of the meetings will be to share key project information as well as to solicit input, scope the key issues to be addressed, and gather information regarding the study area and the elevated tank and pumping station siting options.

It is anticipated that these meetings will take place following the evaluation of siting options. COLE will provide agendas as well as record/distribute the minutes of meeting to those in attendance.

3.3 Indigenous Communities Consultation

As part of the communications and consultation process, COLE will contact First Nations and Métis groups at key project milestones (i.e., Notice of PIC#2 and Notice of Study Completion). As part of the consultation, we will confirm with the City their approach for First Nations and Métis consultation to ensure that we are consistent with other City projects.

As a preliminary step, COLE has conducted a search on the Aboriginal Affairs and Northern Development Canada website for First Nations and Métis groups. The results of the search shows the Six Nations Indian Reserve in Cayuga and associated groups (see **Appendix C**). To confirm the current list of groups, we will contact Indian and Northern Affairs Canada and the Ministry of Aboriginal Affairs and request a current

list of First Nations and Métis groups that may have direct affiliation to the area and may have an interest in the project.

As First Nations and Métis consultation is an important part of the Class EA process and is of high interest to the MOECC, COLE will maintain a chronology of contact points to document the consultation process throughout the study. This chronology will ultimately be included in the Project File Report.

4 Consultation Documentation

In addition to meeting meetings and/or relevant e-mail correspondence, consultation documentation will include PIC Summary memorandums and a Comment Tracking Table which will ultimately be incorporated into the Project File Report.

4.1 Public Information Centre Summary

As summary memorandum will be prepared after each PIC. The summary will include details about the PIC such as location, venue, time, information that was presented, number of attendees and comments/issues that were raised at the PICs. Comment sheets and responses will also be included in the summary report.

4.2 Comment Tracking Table

A comment tracking table will be maintained throughout the duration of the study. It will document all comments/issues received from agencies, stakeholder and the general public, the type of correspondence (e.g., email, letter), who is was addressed to as well as when it was received. The table will also document responses to the comments/issues received.

4.3 Project File Report

At the end of Phase 2, a Project File Report will be prepared by COLE that will document Phases 1 and 2 of the Schedule B Municipal Class EA planning process, including all communications and consultation that took place throughout the duration of the study. Personal/identifying public information will be obscured (redacted).

Notice of PIC #1

LET'S TALK! ELFRIDA GROWTH AREA STUDY

HELP SHAPE THE NEW COMMUNITY FOR ELFRIDA

WHAT IS THE ELFRIDA GROWTH AREA STUDY?

The City of Hamilton is growing and the population is projected to increase to 660,000 by 2031. While the City has made efforts to grow within its current urban boundary, an urban boundary expansion is required to accommodate future population growth. In reviewing opportunities for where future growth could occur, the Elfrida area was identified as the preferred location.

WHY SHOULD I ATTEND THIS MEETING?

We need your help! Gather your friends and neighbours and join us to share your ideas about how this area should be planned for the future. At this meeting we hope that you can share what is important to you so that we can include your ideas as we plan for a new community in the Elfrida Area.

At this meeting staff will present three very different development scenarios for Elfrida and we need you to let us know what features you like, and dislike, and what other elements we may not have included but need to consider.

The meeting will begin with a presentation about the different development scenarios followed by small group discussions about the different components of each scenario. Input is important and will be used to identify the key elements that should be carried forward to shape a recommended plan.

ELEVATED WATER STORAGE FACILITY AND PUMPING STATION STUDY FOR PRESSURE DISTRICT 7

At this meeting the City will also have information available on the Municipal Class Environmental Assessment (Class EA) study that has been initiated to identify the preferred site for a new water storage facility and pumping station. This study is being conducted in accordance with the approved requirements for a Schedule "B" project as described in the Municipal Engineers Association's Municipal Class EA document (October 2000, as amended in 2007, 2011 & 2015). The Class EA process will include the evaluation of alternative sites for the proposed storage facility and pumping station, selection of the preferred site(s), and review agency and public consultation. Information about the study will be available at the meeting.

WHEN & WHERE?

DECEMBER 6, 2017

6:00 - 8:30 pm

Presentation at 6:30 pm

VALLEY PARK RECREATION CENTRE AND ARENA (GYMNASIUM)

970 Paramount Drive
Stoney Creek, Hamilton

Advance requests are encouraged to enable us to meet your needs adequately.

Appendix C

Indigenous Communities

Mapping

The information contained in the Community Profiles is extracted from the authoritative source systems used for the ongoing operations of the department. Maintaining high quality data is important to the Department however, inconsistencies are occasionally overlooked. If you spot inaccuracies in the profiles, please contact the Aboriginal Affairs and Northern Development Reference Desk at Reference@aadnc-aandc.gc.ca.

LET'S TALK! ELFRIDA GROWTH AREA STUDY

HELP SHAPE THE NEW COMMUNITY FOR ELFRIDA

WHAT IS THE ELFRIDA GROWTH AREA STUDY?

The City of Hamilton is growing and the population is projected to increase to 660,000 by 2031. While the City has made efforts to grow within its current urban boundary, an urban boundary expansion is required to accommodate future population growth. In reviewing opportunities for where future growth could occur, the Elfrida area was identified as the preferred location.

WHY SHOULD I ATTEND THIS MEETING?

We need your help! Gather your friends and neighbours and join us to share your ideas about how this area should be planned for the future. At this meeting we hope that you can share what is important to you so that we can include your ideas as we plan for a new community in the Elfrida Area.

At this meeting staff will present three very different development scenarios for Elfrida and we need you to let us know what features you like, and dislike, and what other elements we may not have included but need to consider.

The meeting will begin with a presentation about the different development scenarios followed by small group discussions about the different components of each scenario. Input is important and will be used to identify the key elements that should be carried forward to shape a recommended plan.

ELEVATED WATER STORAGE FACILITY AND PUMPING STATION STUDY FOR PRESSURE DISTRICT 7

At this meeting the City will also have information available on the Municipal Class Environmental Assessment (Class EA) study that has been initiated to identify the preferred site for a new water storage facility and pumping station. This study is being conducted in accordance with the approved requirements for a Schedule "B" project as described in the Municipal Engineers Association's Municipal Class EA document (October 2000, as amended in 2007, 2011 & 2015). The Class EA process will include the evaluation of alternative sites for the proposed storage facility and pumping station, selection of the preferred site(s), and review agency and public consultation. Information about the study will be available at the meeting.

CANADA & WORLD

Refugee system isn't for economic benefit

Refugee status means you have nowhere to go, Trudeau says

STEPHANIE LEVITZ

OTTAWA — Would-be Canadians need more than just a desire for a better economic future if they expect to be granted refugee status in this country, Prime Minister Justin Trudeau said Thursday.

Trudeau, speaking at an event in Charlottetown, pointed to the case of 6,300 Haitians who have crossed illegally into Canada from the U.S. in recent months to request asylum. Statistics released this week show that of the 298 cases that had been heard by the end of October, only 29 were granted protection.

"Refugee status means that you have nowhere to go, you can not be protected by your home state," the prime minister said. "It's not just a question of, 'I'm looking for an economic future, so I want to come to Canada.'"

The Immigration and Refugee Board is working its way through more than 14,000 cases lodged by people who've crossed illegally into Canada from the U.S. since February. So far, they've heard 1,572 and the overall acceptance rate is about 60 per cent. Haitians make up the majority of claims.

But though that country has its economic challenges, it's far from a failed state, Trudeau noted.

"There are people in different parts of the world who need help more, who have a more urgent need," he said. "We must ensure

CANADIAN PRESS FILE PHOTO

Family members are helped into Canada by RCMP officers along the U.S.-Canada border near Hemmingford, Que., last year.

that our immigration system remains intact and that Canadians continue to have confidence in our immigration system."

The analysis of who has crossed the border illegally this year — along with the results of their IRB hearings — is on the agenda at a meeting scheduled for later Thursday in Ottawa between federal and provincial officials overseeing irregular migration at the border.

The task force was established at

the height of a surge in asylum seekers this summer coming into Quebec from New York.

Trudeau spoke out about the Haitians coming to Canada in response to a question in French from a man who identified himself as a Sudanese refugee.

He wanted to know why Canada wasn't doing more to assist those fleeing famine or conflict around the world.

The prime minister called himself the "steward and a custodian of

something precious" — public support for immigration — and said the government is always working to find a balance between helping those who need it and having a system in place to ensure those who do stay in Canada are able to thrive.

"We can't simply open the door to the entire world without a rigorous process to ensure security and also ensure that children and their families succeed."

The Canadian Press

U of T contract staff vote in favour of strike mandate

THE CANADIAN PRESS

TORONTO — Contract academic workers at the University of Toronto have given their union a 91 per cent mandate in favour of strike action as they work toward a new agreement.

The Canadian Union of Public Employees says the workers include non-student sessional lecturers, writing instructors and music professionals.

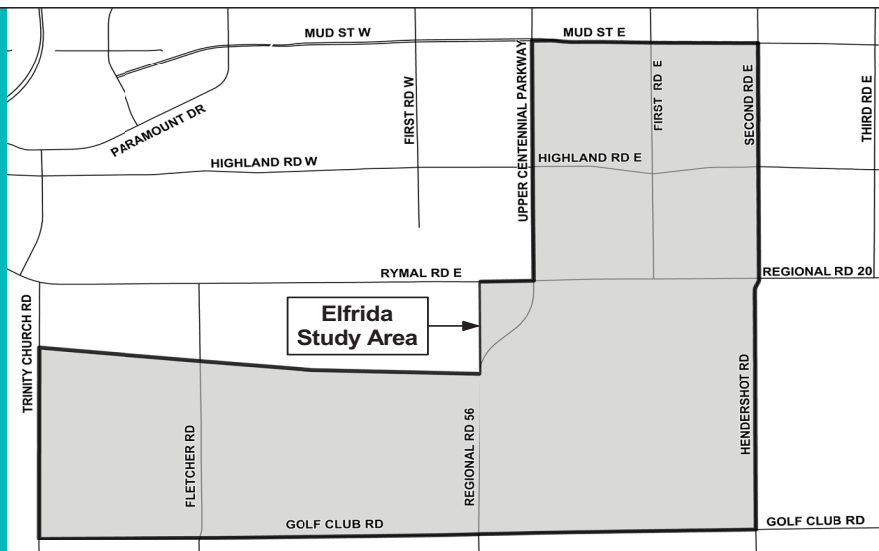

CUPE says the key issue is how post-secondary institutions rely on "precarious labour," with sessional lecturers at the university delivering more than 20 per cent of all undergraduate teaching, yet earning less and having little to no job security. Union official Jess Taylor says after four months of bargaining, they have made some gains at the table in terms of wage increases, but contract workers need a pathway to permanent employment.

The University of Toronto says it's committed to reaching a new collective agreement for the approximately 1,200 sessional instructors.

The two sides are scheduled to resume bargaining on Friday and Taylor says the union hopes the strike mandate message is "well received" by university negotiators.

The university said a key issue is a union proposal that would require the university to "convert" a minimum number of sessional lecturers to full-time teaching and tenure stream faculty positions.

LET'S TALK! ELFRIDA GROWTH AREA STUDY

HELP SHAPE THE NEW COMMUNITY FOR ELFRIDA

WHAT IS THE ELFRIDA GROWTH AREA STUDY?

The City of Hamilton is growing and the population is projected to increase to 660,000 by 2031. While the City has made efforts to grow within its current urban boundary, an urban boundary expansion is required to accommodate future population growth. In reviewing opportunities for where future growth could occur, the Elfrida area was identified as the preferred location.

WHY SHOULD I ATTEND THIS MEETING?

We need your help! Gather your friends and neighbours and join us to share your ideas about how this area should be planned for the future. At this meeting we hope that you can share what is important to you so that we can include your ideas as we plan for a new community in the Elfrida Area.

At this meeting staff will present three very different development scenarios for Elfrida and we need you to let us know what features you like, and dislike, and what other elements we may not have included but need to consider.

The meeting will begin with a presentation about the different development scenarios followed by small group discussions about the different components of each scenario. Input is important and will be used to identify the key elements that should be carried forward to shape a recommended plan.

ELEVATED WATER STORAGE FACILITY AND PUMPING STATION STUDY FOR PRESSURE DISTRICT 7

At this meeting the City will also have information available on the Municipal Class Environmental Assessment (Class EA) study that has been initiated to identify the preferred site for a new water storage facility and pumping station. This study is being conducted in accordance with the approved requirements for a Schedule "B" project as described in the Municipal Engineers Association's Municipal Class EA document (October 2000, as amended in 2007, 2011 & 2015). The Class EA process will include the evaluation of alternative sites for the proposed storage facility and pumping station, selection of the preferred site(s), and review agency and public consultation. Comment Sheet
Public Information Centre – December 6, 2017

The City of Hamilton is conducting a Municipal Class Environmental Assessment (EA) study to identify the preferred site for a new elevated water storage facility and pumping station. As identified in previous studies completed by the City, this new infrastructure is required for security of supply, water system balancing, and to provide water supply for future growth within the southeast mountain area (Pressure District 7).

We are interested in your comments and suggestions regarding this project. Please take a few minutes to complete this comment sheet.

1. Why are you interested in this project?

2. The alternative sites will be compared based on the evaluation criteria listed on the displays. Are there any other criteria that should be considered? Yes No

3. What impacts might this project have on you? What would you like the project team to consider during construction?

4. Do you have any additional comments or require further information about the project?

5. Would you like to be added to the project mailing list? Yes No

Please submit your written comments before leaving the Public Information Centre.

If you require more time to comment, please send your comments to either of the following Project Team Members by December 22, 2017:

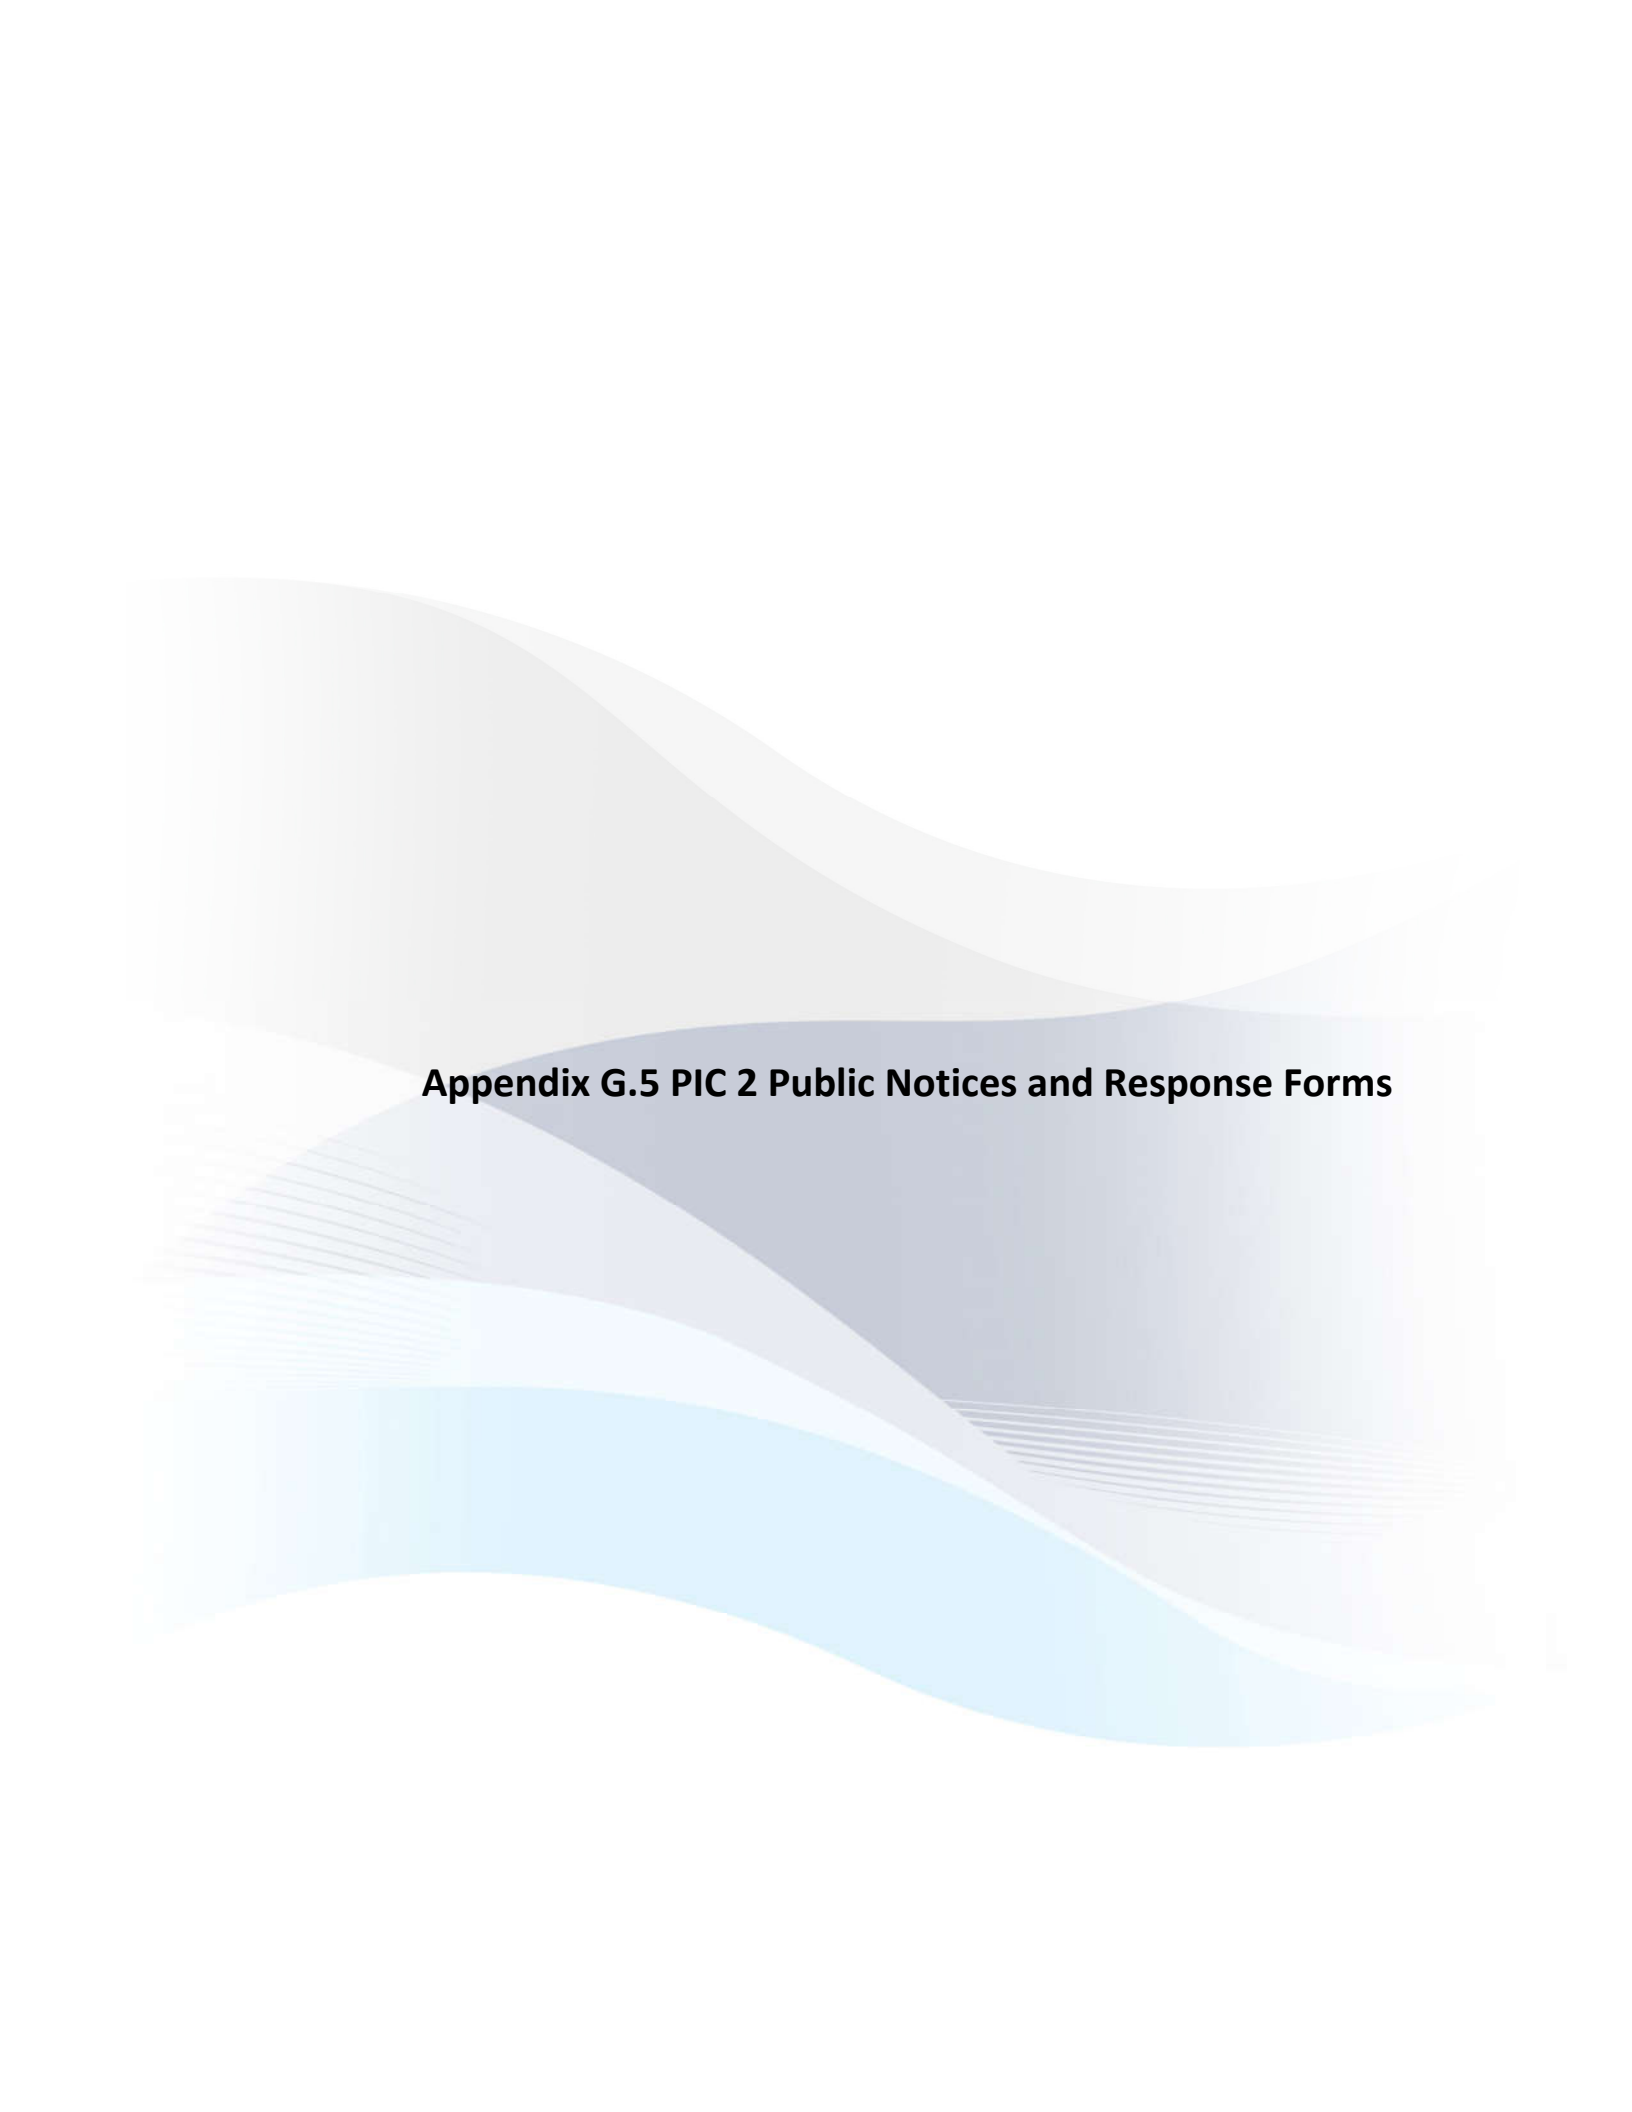

Jennifer Whittard
Senior Environmental Planner
Cole Engineering Group Ltd.

ELFRIDA SUBWATERSHED STUDY

NOTICE OF PUBLIC INFORMATION CENTRE 2

The Subwatershed study is intended to present an approach to manage, protect, and enhance the natural environment. This includes stormwater management (quality and quantity), as well as terrestrial and aquatic resources within the Elfrida study area limits. Major issues and opportunities have been identified which provide the basis to guide future growth in an environmentally sound manner. The Phase 1 findings have been updated since the June 2017 study commencement/public consultation and will be available at the community meeting. This Study follows the planning and design process defined in the Municipal Engineers Association's Municipal Class Environmental Assessment document (October 2000, as amended in 2007, 2011 & 2015).

NEWS

Hamilton officials waiting on Ontario for enforcement rules on cannabis smoking

KEVIN WERNER
 kwerner@hamiltonnews.com

When the federal government legalizes the use of recreational marijuana, Hamilton's updated smoking restrictions could prevent people from toking or vaping in parks and other city facilities.

Hamilton councillors approved a bylaw amendment on May 23 to prohibit tobacco smoking at all city parks, open spaces, recreational properties, buildings and structures.

The bylaw may also cover vaping, which is the act of inhaling vapour produced by a vaporizer or electronic cigarette, and smoking recreational cannabis when it becomes legal, expected later this

year. Elizabeth Richardson, Hamilton's medical officer of health, said smoking tobacco, vaping and smoking medical marijuana will be covered under the Smoke-Free Ontario Act, updated in 2017, which prevents smoking or holding lighted tobacco in any enclosed workplace, enclosed public places and designated outdoor places.

She said the Ontario government is working behind the scenes to establish enforcement regulations for recreational marijuana.

Richardson said when recreational marijuana is legalized, it is expected it will be included under the provincial act, but municipalities have yet to be offi-

cially informed. "We are still waiting," Richardson said.

However, municipalities are allowed to establish non-smoking bylaws that expand upon provincial legislation.

Mountain Coun. Tor Jackson said Hamilton has "done a tremendous job" curtailing smoking.

"Hopefully we are not slow out of the gate with vaping and cannabis," he said.

As for when recreational marijuana will be legalized, it is suggested that it could happen by September.

"It would be nice to know when the due date is," said Ancaster Coun. Lloyd Ferguson during the May 23 council meeting.

LET'S TALK! ELFRIDA

TUESDAY JUNE **6:00 - 8:30 PM**
12 Presentation at 6:30 pm
2018 **VALLEY PARK RECREATION CENTRE AND ARENA (GYMNASIUM)**
970 Paramount Drive
 Stoney Creek, Hamilton

COMMUNITY MEETING

ELFRIDA GROWTH AREA STUDY

The City of Hamilton is growing and the population is projected to increase to 680,000 by 2031. While the City has made efforts to grow within its current urban boundary, an urban boundary expansion is required to accommodate future population growth. In reviewing opportunities for where future growth could occur, the Elfrida area was identified as the preferred location.

HELP SHAPE THE NEW COMMUNITY FOR ELFRIDA

Gather your friends and neighbours and join us to share your ideas as we plan for a new community in the Elfrida Area. At this meeting staff will discuss the evaluation process for the three development scenarios that were presented at the last meeting, and the preferred community structure ideas which will be carried forward to a future recommended plan. We need you to let us know what you think of the evaluation and if there are other things we need to consider.

The meeting will include a presentation about the evaluation process and preferred community structure ideas followed by small group discussions about the different preferred elements. Input is important and will be used to complete the evaluation and confirm the community structure ideas that should be carried forward to shape a recommended plan.

ELFRIDA SUBWATERSHED STUDY

NOTICE OF PUBLIC INFORMATION CENTRE 2

The Subwatershed study is intended to present an approach to manage, protect, and enhance the natural environment. This includes stormwater management (quality and quantity), as well as terrestrial and aquatic resources within the Elfrida study area limits. Major issues and opportunities have been identified which provide the basis to guide future growth in an environmentally sound manner. The Phase 1 findings have been updated since the June 2017 study commencement/public consultation and will be available at the community meeting. This Study follows the planning and design process defined in the Municipal Engineers Association's Municipal Class Environmental Assessment document (October 2000, as amended in 2007, 2011 & 2015).

ELEVATED WATER STORAGE FACILITY AND PUMPING STATION STUDY FOR PRESSURE DISTRICT 7

NOTICE OF PUBLIC INFORMATION CENTRE 2

This study commenced in 2017 and the first Public Information Centre was held on December 6, 2017. At this second meeting, the City will have information available on the Municipal Class Environmental Assessment (Class EA) study initiated to identify the preferred site for a new water storage facility and pumping station. This study also follows the requirements for a Schedule "B" project as described in the Municipal Engineers Association's Municipal Class EA document (October 2000, as amended in 2007, 2011 & 2015). Study details, including background information, alternative siting options, evaluation results, recommended sites, and proposed mitigation measures will be available at the community meeting. All interested individuals are encouraged to attend. Written comments are also invited for further consideration.

**Re: Public Information Centre (PIC) No. 2
Schedule 'B' Municipal Class Environmental Assessment Study
Elevated Water Storage Facility and Pumping Station for Pressure District (PD) 7**

Dear Sir/Madam;

The City of Hamilton has initiated the Schedule 'B' Municipal Class Environmental Assessment (EA) Study for an Elevated Water Storage Facility (EWSF) and Pumping Station at Pressure District (PD) 7. The purpose of this Class EA is to determine the preferred site(s) for a new elevated water storage facility and pumping station to provide water supply for future growth within PD7, and to address security of supply and water system balancing.

We have enclosed for your information a copy of the Public Information Center (PIC) No. 2, as part of the Elfrida Growth Area Study, which will appear in The Hamilton Spectator on June 1, 2018 and in the Stoney Creek News and the Glanbrook Gazette on May 31 and June 7, 2018, respectively. If your agency/office has any comments or input regarding this project, we invite you to complete and return the attached Response Form by July 12, 2018.

For further information or if you wish to provide input regarding this project, please contact the undersigned at 905-546-2424 ext. 4092 or via email at winston.wang@hamilton.ca.

Yours truly,

A handwritten signature in black ink that reads "Winston Wang".

April 27, 2018

**Re: Elevated Water Storage Facility and Pumping Station Municipal Class Environmental Assessment Study for Pressure District 7
REQUEST FOR PERMISSION TO ENTER**

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) study to select the preferred sites for a new elevated water storage facility and pumping station to address security of supply, water system balancing, and to provide water supply for future growth within the southeast mountain area (Pressure District 7). As shown on the attached map, alternative sites within the study area were identified and presented at a Public Information Centre held in December 2017. The alternative sites are now being comparatively evaluated to determine the recommended sites for this important new infrastructure. Further information is available on the City's project website at: <https://www.hamilton.ca/city-planning/master-plans-class-eas/>.

Request for Permission to Enter

As part of the natural environmental field investigations to be completed starting in late May 2018, the City of Hamilton, through their consultant, Cole Engineering Group Limited (COLE), is requesting permission to enter your property at [REDACTED]

As part of the Class EA study, the purpose of the site visit will be to characterize existing natural heritage features and functions (e.g., potential for significant wildlife habitat, species at risk, etc.) within approximately 150 m of each of the alternative sites. The site visit will be limited to non-intrusive visual survey of plant species and incidental observation of wildlife and potential wildlife habitat. It is currently anticipated that the site visit will occur sometime between late May and late July 2018.

If you wish to deny access to your property, a best approximation of natural heritage features will be made through visual survey from adjacent lands.

Next Steps

Please sign the acknowledgement below and send a copy to myself at the address provided on this letter. Alternatively, please feel free to send your response via e-mail at winston.wang@hamilton.ca or contact me at 905-546-2424, extension 4092 to discuss the matter further.

A second Public Information Centre (PIC) is tentatively scheduled for June 12, 2018 to present study details, including background information, alternative siting options and results of the evaluation, the recommended sites, and proposed mitigation measures. You will receive notification of the PIC via similar letter. You are encouraged to attend the PIC or visit our website for further information. In the

meantime, please do not hesitate to contact me if you have any questions. We thank you for your cooperation in this important project.

Yours sincerely,

Winston Wang, M. A. Sc., P. Eng.
Project Manager
