PROJECT TEAM

Victoria Cox, Landscape Architect, City of Hamilton
Landscape Architectural Services
Jana Joyce, Landscape Architect, MBTW
Graham Carr, Landscape Architect, MBTW

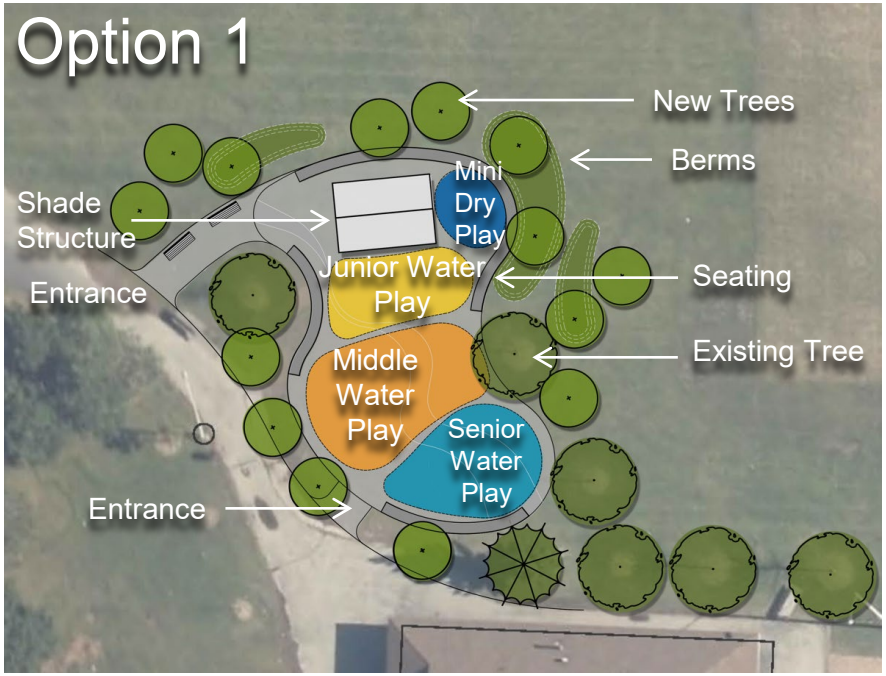
Ward 3 Office
Nrinder Nann, Ward 3 Councillor
Alexandra Weinberger, Ward 3 Executive Assistant

In collaboration with:
Niwasa Kendaaswin Teg organization and a special thanks to Monique Lavallee.

SURVEY 2 RESULTS

RESULTS - LAYOUT

- Following the first Public Information Centre on December 7th 2021 an online survey was released for the community to vote on their preferred layout, mini dry play area features, various water play features and shade structure. Layout Option 1 received the most votes.



RESULTS – MINI DRY PLAY AREA

- All dry play elements were generally ‘liked’ more than ‘disliked’; however, kinetic wobble board, logs and communications board were the top 3.

Communication Board

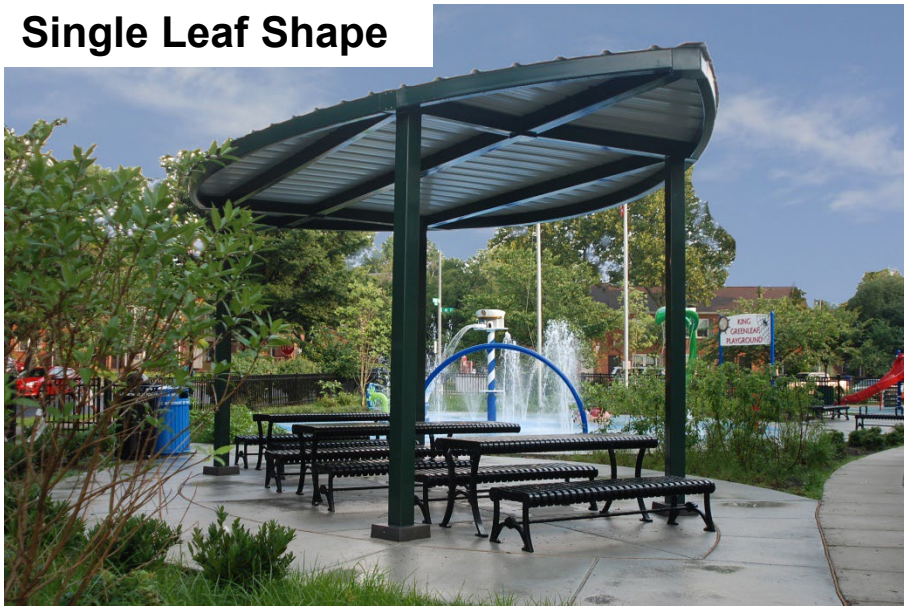
Kinetic Wobble Board/Seating

Logs

RESULTS – SHADE STRUCTURE

- The single leaf shade structure received the most votes.

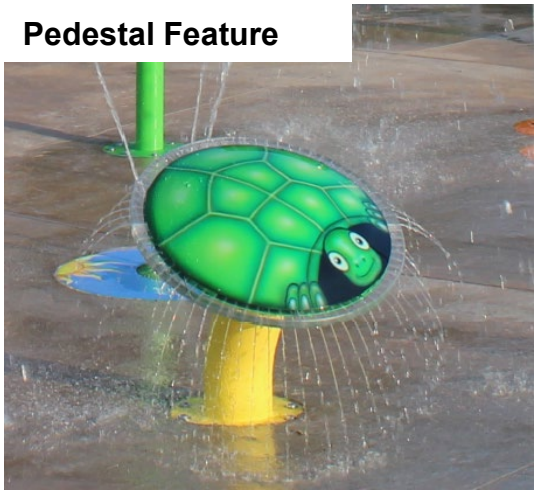
Single Leaf Shape



RESULTS – JUNIOR WATER PLAY AREA

- The pedestal feature and geyser received the most votes for the Junior Water Play area.

Pedestal Feature



Geyser

RESULTS – MIXED WATER PLAY AREA

- The mister and leaf rain feature received the most votes for the Mixed Water Play area.

Mister

Leaf Rain

RESULTS – SENIOR WATER PLAY AREA

- The spray rings were voted the highest, followed by the dump bucket, ground sprayer and animal sprayer (all tied for second) for the Senior Water Play area.

Spray Rings

Dump Bucket

Ground Spray

Animal Spray

REFINING THE DESIGN

COLLABORATION WITH NIWASA

- City staff and the design team have been collaborating with Niwasa Kendaaswin Teg, a local non-profit community group that provides high quality programs and services to the Indigenous population in Hamilton, Brantford and surrounding areas.

- Niwasa has provided invaluable guidance and feedback through the design process as the community expressed a desire to include aspects of Indigenous culture and natural elements in the design of the spray pad through the first survey.

NIWASA
Kendaaswin Teg

COLLABORATION WITH NIWASA

- Words written in Ojibwe, Mohawk and English have been engraved in the concrete throughout the spray pad in close proximity to the item in nature they represent. The representation of Indigenous languages in the spray pad honours the nations who lived and travelled these lands and waterways and the First Nation, Métis and Inuit residents who reside in Hamilton today.

- City staff and the design team continues to work with Niwasa on signage that will be included within the spray pad area.

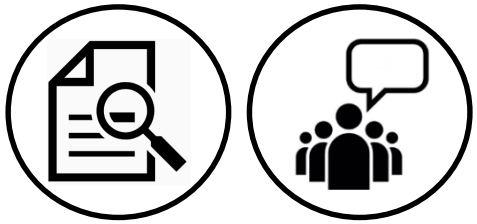
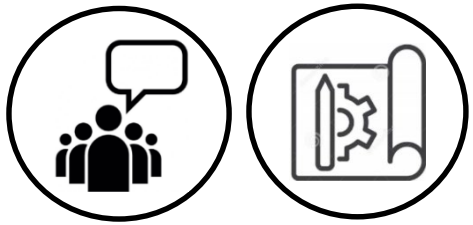
TIMELINE



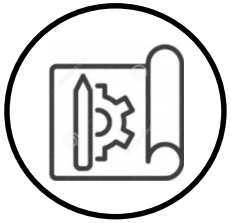
FALL 2021

- Studies & Investigations (Archaeology & Geotechnical)
- Community Engagement (Survey No. 1)



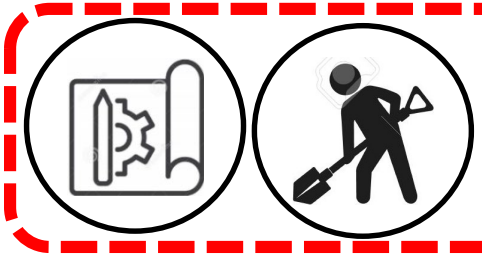
FALL & WINTER 2022

- Follow-up Engagement (Survey No. 2)
- Finalize Concept



WINTER & SPRING 2022

- Ongoing Design Work & Collaboration with Niwasa
- Construction Drawings & Document Preparation



SUMMER & FALL 2022

- Finalize Design, Construction Drawings & Documents
- Construction Start

WE ARE HERE
(JULY 2022)
