Observations

Definitions Section:

SLR = SLR Consulting (Canada) Ltd.
Wood = Wood Environmental & Infrastructure Solutions a division of Wood Canada Limited.

Provincial Officer Order (POO) Number 1-J25YB was issued on August 2, 2018 requiring, among others, the submission of the following:

"1. (b) Retain a licensed external Qualified Person (QP) with appropriate expertise in remediation of wastewater discharges to the natural environment, to evaluate impacts to Chedoke Creek from the sewage discharged from the Main/King CSO facility to Chedoke Creek between January 28, 2014 and July 18, 2018. This evaluation shall identify whether remediation and/or mitigation of Chedoke Creek is required, and (if remediation and/or mitigation is recommended), make recommendations regarding the most effective way to complete the remediation and/or mitigation. Submit a written report on the results of 1. (b) to the undersigned Provincial Officer by October 31, 2018."

and

"1.(c) Submit a written report on the associated implementation timeline for any necessary remedial and/or mitigation work with respect to Chedoke Creek, to the undersigned Provincial Officer by November 30, 2018."

Item 1. (b) and (c) were both submitted on January 31, 2019 after the approval of two (2) request for extensions.

On March 20, 2019, the City reported that a peer review was being conducted of the original reports.

On May 30, 2019 the Ministry received both: a Peer Review Report by SLR, dated May 15th, 2019; and a Memo from Wood, dated May 23, 2019.

On September 19, 2019 clarification/confirmation was requested from the City due to the Ministry's review, which found that requested information in the POO was not provided. The Ministry had expected that the City would do the following:

- evaluate impacts at the time of the spill through to date to Chedoke Creek and Cootes Paradise from the sewage discharged and possible material remaining in the creek from the Main/King CSO facility spilled to Chedoke Creek between January 28, 2014 and July 18, 2018;
- identify any anticipated on-going impacts, including the impacts noted above, and review options to remediation and/or mitigation, and/or monitoring of Chedoke Creek/Cootes Paradise and recommend and justify what is and is not required for cleanup and further mitigation; and
- and (if remediation and/or mitigation and/or monitoring is recommended), make recommendations regarding the most effective way to complete the remediation and/or mitigation and/or monitoring.

On October 1, 2019 the City reported additional sampling work was completed at the site during the last week of September 30, 2019.

On October 10, 2019 the Ministry requested a final report and recommendations by November 15th. Due to field work just completed and lab analysis turn around time, the City indicated that a final SLR report could not be provided until the end of January 2020.

The City was requested to provide more information to support the delay in the submission by October 18, 2019.

The City plan to receiving a draft Ecological Risk Assessment (ERA) by SLR at the end of January 2020.
